- ★ Dermatologists are hailing it as the most potent needle-free skin care treatment available to science. Studies have shown it prevents "cell damage linked to facial aging and wrinkles"
- ★ **Endorsed by the former Director of Ford Models who represented Supermodels CLAUDIA SCHIFFER, HEIDI KLUM & EVA HERZIGOVA**
- ★ Oscar winner Charlize Theron, Pamela Anderson, the Beatles' Sir Paul McCartney, Star Trek's William Shatner, American Idol's Simon Cowell, tennis champ John McEnroe, Alicia Silverstone, Rev Al Sharpton and fashion designer Stella McCartney are members of PETA - people for the ethical treatment of animals - and they have certified this anti-aging skin care secret to be 100% cruelty free of animal testing
- ★ **Finally, revealed - the amazing anti-aging skin care secret used by middle-aged fashion models who constantly get accused of being under-age**
- ★ Its stunning "reverse the clock" effect on your face has to be seen to be believed... and the best part is... you'll see results in 60 seconds...

- by Michelle Bell

**From: Dr. Janet Allenby
Delray Beach, FL
Saturday, March 3, 2012**

My name is Janet Allenby, I am a cosmetic surgeon and a dermatologist who has been practicing for many... many years.

I'm professionally accredited with the American Osteopathic Association, American Academy of Dermatology, American Osteopathic College of Dermatology, American Society for Dermatologic Surgery, Dermatology Foundation, and the American Contact Dermatitis Society.

In addition, I've been a faculty member at the dermatology residency program at Columbia Hospital. And I've been the recipient of the prestigious Daniel Koprince, D.O. Educational Award.

I am excited to report to you that now many expensive Botox injection sessions and cosmetic surgeries can be either postponed or eliminated completely because of a brand new cosmeceutical that can postpone or even prevent the need for these invasive procedures in the first place.

Hard to believe? Of course, it is. I wouldn't believe it myself, if I hadn't seen it with my own eyes.

In all my many years of experience, I have never come across a product quite like this. It is called **LifeCell** — an all-natural approach to preventing the signs of aging by putting nature's most powerful nutrients to work for your skin.

In many cases this unique product can not only postpone, it can

Get Yours OnLine Now

even eliminate the need for Botox injections or cosmetic surgery for many individuals whose only complaint is the appearance lines, wrinkles, sagging skin, age-spots, under-eye dark circles & puffiness and "feather" lips that adds years to their face.

Youthful Skin at Any Age
- A Promise Backed by Scientific Proof

Like me, many other cosmetic surgeons and dermatologists recommend **LifeCell** to our patients. So please, before you come to see me or any other cosmetic surgeon, try this revolutionary cosmeceutical first. But before you do, read below how it all came to be through blind luck that struck a brave woman, Michelle Bell.

Thank you.

Sincerely,

Janet Allenby, DO

From: Michelle Bell
South Beach Miami, Florida
Saturday, March 3, 2012

Dear Friend,

s you can see, I have attached my picture to the top of this letter. Why have I done this? Actually, there are two reasons:

1. What I have to say is of extreme importance, so I thought putting my picture, as a little "eye-catcher" would grab your attention.
2. This letter has the potential of changing your appearance... as dramatically as explained in my picture.

Here's what it's all about: My name is Michelle Bell and the first thing you need to know about me is... I'm not a doctor.

I'm not an Esthetician either. I never went to college to study skin care and I don't have a degree in anything even remotely related to it. In fact, the only thing I consider myself an "expert" on is...

"I Know How A-List Hollywood Actors, Celebrities, Super-Models And Even...European Royalty... Use A Nobel Prize-Winning Discovery To Keep Their Skin Looking Young, Beautiful, And Age-Free Without Cosmetic Injections Or Plastic Surgery!"

...and if you're interested in learning this for yourself then what I'm about to reveal in this brief letter will be the most important beauty secret you will ever discover.

Also what I have to tell you involves a *chilling* multi-billion dollar *dark scandal* taking place in the anti-aging market...RIGHT NOW. It's an alarming scandal that - if you are like most women I know - is cheating you out of a lot of your good money...your time...and (worse!)...is robbing you of the benefits you should be getting from these products.

Here is why: A few months ago, I went shopping with my friends to look for an evening gown. They were throwing me a formal party for my birthday and I wanted to look my gorgeous best. It didn't take me long to spot it in the store window - the perfect halter in the perfect blue in the softest silk ever. I had to

Under penalty of perjury, we formally state that the following comments are from REAL customers and REAL medical professionals. See if anyone else is willing to say that about their testimonials. They can't, because theirs are FAKE. If you have a REAL testimonial, send it at testimonials@lifecellskin.com

European Royal Family's Baroness Says, "For Those Of You Who Want Serious Anti-Aging Skin Care, This Is The Product To Use, Bar None!"

(Jennifer Hohenzollern is part of the European Royal Family. Jennifer's father belongs to the German Czar's Nobility (similar to the Queen of England's family) giving Jennifer the title of "Baroness," and her mother is the daughter of a Hungarian Princess. Jennifer is a famous painter based in Berlin,

have it. Without even bothering to look at the price tag, I excitedly took it to the cashier. She looked at the gown, looked at me and asked (gasp)...

"Would You Like To Take Advantage Of Our Senior-Citizen's Discount Card?"

My heart sank! I was speechless. Dead silence flooded the floor. No one said a word...but the silence was painfully screaming. As I walked out of the store I felt like I had just gone through...

"12 Hard Rounds Of Bloody Punches In The Boxing Ring!"

Although I laughed it off, I was deeply hurt and humiliated! I'd been looking forward to my 38th birthday, but now my confidence was shattered.

When I got home...I rushed to the bathroom.

I looked in the mirror and a stranger was staring back at me; a stranger with baggy pouches under her eyes and lines that seemed to echo laughing.

Except I wasn't laughing! I was wondering: Who is this wrinkled woman and how did she get in my mirror? Ah! The sad truth is, it's me. Yikes...I'm beginning to look old!

"It Was A Frightening Thought!"

On talking with my close friends I discovered we all were swimming in the same choppy waters.

My friend Lindsey, with tears welling up in her eyes told us about how she was once out to dinner with her husband Jeff...who is only a few years younger than her. The waitress asked Jeff:

"Would You And Your MOTHER Like To Get Started With A Glass Of Red Wine?"

For the next few months she stopped going out to restaurants.

One of Vanessa's most frightful nightmares in life was...

Getting Old Alone...

...and being lonely for the rest of her life because no one finds her attractive anymore.

The stories go on and on. The names, ages (30s, 40s, 50s, 60s, 70s and beyond) and situations are all dramatically different...but one

Germany. Her artwork is featured in galleries all over the world including: Germany, Italy, Canada and the US.)

**Jennifer Hohenzollern
Baroness
European Royalty
(Click To Enlarge)**

Here is what Jennifer says...

I am 50 years old. I care about my vanity just like everybody else does. Botox injections and plastic surgery give me the jitters. I just don't have the stomach to go through those kinds of invasive procedures.

No injections or drastic procedures needed

I've used some of the most expensive anti-aging and anti-wrinkle creams from the top lines in the world. I've tried, European and American anti-aging skin care products. I've had companies make "custom-formulations" for my skin. I've consulted with some of the best dermatologists in the world. I've tried alternative skin therapies. I've been to some of the top spa's in the world. I've pretty much tried everything out there!

And I have to say, **LifeCell** beats them all. It is an awesome anti-aging product! Truly! I was so very relieved when my dermatologist recommended this product to me. It's feels like taking the doctor home and you don't even need a prescription.

For those of you who want serious anti-aging skin care, this is the product to use, bar none. I love the fact that it is an all-in-one cream that diminishes the appearance of wrinkles, sagging skin, age-spots, under-eye dark circles and skin discoloration.

That's just so convenient. I use it in the morning and at night. I always get compliments on my skin and that in spite of years of sun worshipping as a teen. It is never too late!

87-Year-Old World Famous Ballerina, Born During World War I Says, "The Price Tag For LifeCell Is A Lot Less Painful Than An Injection!"

**Olga Suarez
(Click To Enlarge)**

87-year-old Olga Suarez was an extremely famous Broadway Ballerina in her youth and has adorned the covers of many fashion magazines such as: Esquire & Collier (famous magazine back in the days). She was the head ballerina for George Ballanchine... the man credited with introducing ballet to NYC. She was head ballerina for Broadway super-hit musical, "Song Of Norway" that played in the Majestic Theatre and the lead dancer in Ruth Paige's, "Music In My Heart."

Listen to what Olga has to say...

I am 87 years old. I was born during World War I. And if I had a dollar for every anti-wrinkle and anti-aging product that I've used during the last 87 years that did not work, I would probably have enough money to buy a skin care company and make a product that actually did work.

[Click To Watch...](#)

thing remains the same...

"How You Feel When It Happens To You?"

Let's be straight: Today, we're all living in a youth-culture. It's part Hollywood, part Madison Avenue. We all want to look young and have glowing baby-soft skin.

It's not just vanity that makes us want to look our youthful best. There are also real frustrations. Ageism exists in the workplace, whether we like it or not. Even with a wealth of well-earned, savvy accomplishments, and wisdom you may feel disadvantaged on the job.

Besides, it can be almost impossible to enjoy vibrant sexuality when the media blares out it belongs only to the young and sexy.

There comes a moment in every women's life when how she looks does not connect with how she feels. And this was my moment. I was proud of the person I had developed into. I just wanted my face and body to reflect how young and vibrant I felt on the inside. Brave words, and I believe them.

My quest to discover a way to zap 15 to 20 years off my appearance and yet *age gracefully*, started off by me becoming...

"A Cosmetic Junkie!"

Every time I picked up a magazine and discovered a new anti-wrinkle cream, moisturizer, eye gel, firming serum, or age-spot cream promising miracles...I rushed to the store to pick up a jar. Unfortunately, in exchange for my **personal "wallet-emptying" experience**, I collected a medicine-cabinet full of anti-aging products that did NOT work. What's more - some of the anti-wrinkle creams caused such severe skin irritation and inflammation and swelling - I couldn't even use them.

It was a real shame! I ended up wasting so much time and energy and money...in exchange for disappointing results.

* My dermatologist informed me that most anti-aging and anti-wrinkle skin care products, *even from the most expensive lines*, contain irritants and inflammatory ingredients like peppermint, lemon, camphor, menthol, coltsfoot, amica, and so on. All these ingredients further contribute to *forming lines, wrinkles, age-spots and dark circles*. I did not appreciate this irony.

Finally, after experiencing **heartbreaking results** and *harmful* side-effects, I got sick and tired of **"SNAKE-OIL" ANTI-AGING COSMETICS** based on JUNK SCIENCE. So, I set up an appointment with one of South Beach's most admired cosmetic surgeons. He was extremely expensive but the money I spent on his appointment was probably the...

"Best \$350 I've Ever Spent In My Entire Life!"

Listen to this: Here I am sitting in his office. He told me about how plastic surgery could erase years off my looks. Fantastic. When

Well, I don't have the dollars, but I did find a product that actually works. After so many disappointments, I've become a complete cynic when it comes to anti-wrinkle and anti-aging systems, but **LifeCell** really restored my faith.

Look and feel 10 years younger in 30 days. And we'll prove it to you FREE

It's a good, old-fashioned "get what you pay for" type of, all-in-one, anti-aging skin care system. That's just so convenient. Besides, the price tag for **LifeCell** is a lot less painful than an injection.

It's tough to make 87 year old skin look younger and I know because I've tried all the products available. After using **LifeCell** for about 2 months my skin now looks and feels like that of a 65-year old. I can whole-heartedly say that I would recommend **LifeCell** to anyone who wanted to look younger. And this is coming from a former complete cynic, now only a partial cynic.

**Olga Suarez, Age 87
Former Ballet Dancer
New York, NY**

**Former Director Of Ford Models
Who Represented Heidi Klum,
Claudia Schiffer And Eva Herzigova
- Discovers LifeCell And Religiously
Recommends It To All Her Models...**

**Colleen Graham
Former Fashion Model
(Click To Enlarge)**

Colleen Graham is a former model, and the former director of one of the most recognized modeling agencies in the history of modeling, Ford Models. Among the many (too many to list) feathers in Coleen's cap - she represented Claudia Schiffer & Heidi Klum!

Because the career of the models she represented, depended on them having flawless beautiful skin... Coleen has been a keen follower of the cutting-edge in beauty and skin care technology, with a particular interest in anti-aging treatments.

Listen to what she has to say...

can we start?

As soon as we discuss the risks. Err, risks? It's possible I could end up unhappy with the results and I wouldn't get back my money, and more importantly, my original face. Right. He said, **one study found a staggering 1 in 5 patients who underwent a cosmetic procedure (laser resurfacing) considered their results to be disappointing and a shocking 8 in 10 patients (even those who had good results) said they were against undergoing such a procedure ever again.**

(Source: Facial Plastic Surgery, August 2001)

There has been more than one botched-up job with disastrous results! Sometimes it disfigures a person for life! But like I said, I'm an optimist.

"It Won't Happen To Me! I Thought I'd Get Lucky."

Then he mentioned the details of plastic surgery and an *ice-cold-chill* ran down my spine. You know what I mean: the pain, the drugs, the stitches, the bandages, the swelling... and the weeks of recovery time looking like I was mugged.

And the cost!! He told me it would cost up to fifteen thousand dollars for a complete face-lift. At this point I was about to leave his office and give up on my quest for "youth," when events took a strange twist.

For some reason the doctor stepped out of his office. Having nothing better to do, I started reading the research journals on his desk. Lo and behold (*hold your breath*) one said...

Nobel-Prize-Science-Inspired Discovery May Lead To End Of Surgical Face-Lift — As We Know It

Scientific evidence suggests comprehensive synergistic formula called LIFECELL including precursor to Nitric Oxide - may eliminate need for plastic surgery, Botox® injections and even... lasers.

Oh my God! I said to myself.

It's a shame for you not to reduce the appearance of wrinkles without needles – when thousands of middle-aged supermodels do it easily using anti-aging LifeCell

This isn't some cosmetic company's glossy brochure...with the "usual" outrageous claims and equally "usual" disappointing results. **Those claims in my experience are similar to Big Tobacco claiming smoking is good for health...or even better still...cures cancer.** Nah.

This was a research journal that included a Nobel Prize science inspired research discovery... the most prestigious recognition award on the face of the planet...for groundbreaking scientific breakthroughs!

With a thrilled heart, I flipped through the journal...

I'm 40, but I look (and feel) like I'm 28, again. Thanks to **LifeCell**, no one can tell me I can't look as young as I feel. **LifeCell** age-proofs my skin without surgery, Botox, or a Park Ave. dermatologist. Now I look my age... the one I feel. After I started applying **LifeCell**, men and women that cross my path repeatedly turn their heads to check me out - and it makes me look and feel like a million dollars!

By the way, here's some insider information: **LifeCell** has become a major secret used by middle-aged professional models... including those who make millions of dollars a year. You see, these women often have to look... much younger... than they really are... or else... they lose their jobs! If people in the industry knew some of the models' true ages, it would be difficult for them to get work. Thanks to **LifeCell** they'll never find out the true ages of these models.

"LifeCell Increases My Chances For Second Glances"

My name is Etta Walker and I'm the creative director for a major fashion magazine read all over the United States. As part of my job I have to review and research all kinds of facial creams... all the time. I have to apply them on my face and my skin.

"Fast And Furiously!"

Was I excited? You bet! **I saw convincing impressive anecdotal evidence showing it really worked...and virtually made wrinkles, lines, age-spots, under-eye dark circles & puffiness... invisible...even up close! Womens' complexions looked radiant and glowing like those of babies.** And sagging skin? What sagging skin? The pictures showed the appearance of sagging skin on people's faces just disappeared - like a bad dream. Gone! Zapped.

 **To all women who want wrinkle-free skin without Botox**

The journal had before and after pictures showing amazingly dramatic results...and incredible improvements in the facial texture of the skin. Some of the people in the pictures were almost unrecognizable...after the treatment!

As I was speed-reading my way through the journal, I heard the doctor's footsteps coming back. And so I did something without thinking. I'm not proud of it, but I will never regret it. Come close (*even closer*) and I'll confess...

"I Ripped LifeCell's Formula Page From The Journal And Snuck It In My Purse!"

I couldn't believe what had just happened. Call it what you may. Dumb luck. Good fortune. I believe this was my rendezvous with destiny.

"Trust Me...This Is All True...I Swear!"

After leaving the doctor's office...I immediately contacted Amit Suneja at the prestigious **South Beach Skincare Clinic**. I wanted them to make me an individual portion of this non-invasive, anti-aging formula. Heck, I was willing to fork out some darn serious cash to get the *real deal* because, as you can imagine, by now I'd...

"Had Enough!"

Why did I contact **South Beach Skincare**? Well unless you're on the *inside* of the fashion industry or a *celebrity* I'm almost certain you've not heard of them. But they were (*until now*) the best-kept secret in Hollywood. I know of them because a good friend of mine works there. Almost **all their clients are A-list Hollywood celebrities, supermodels and even... European Royalty!**

* Because of non-disclosure reasons, they are not allowed to reveal the names of their clients. All I am allowed to share with you is that *rumor* has it (*and I am not sure if it's true or not*), five of their clients have won **Oscars**. Many of them have won **Emmys** for their TV performances. Three others are what I consider some of the most drop-dead gorgeous models in the world. And a select few of their clients are **direct descendents of European Royalty!**

Etta Walker
Creative Director
(Click To Enlarge)

And let me tell you, I'm a really big skeptic. I'm in the sun all the time and I have very pale skin. So I have to take care of my skin and I get brown spots very easily.

A friend of mine introduced me to LifeCell and I really didn't believe her when she told me that it was the greatest thing that happened to her.

Well, I tried it anyways, and after two weeks I was literally accused of having work done to my face. I really recommend LifeCell to anybody and everybody. It really changed my life and my skin. I'm so happy with the results. LifeCell increases your chances for second glances.

Etta Walker, Age 41
Creative Director
Sacramento, CA

LifeCell is certified 100% Cruelty-Free of animal testing by PETA - People for the Ethical Treatment of Animals - and is featured in PETA's prestigious 2007 Shopping Guide for Caring Consumers

 Discover the anti-aging secret of middle-aged fashion models who constantly get accused of being under-age!

You can't find a more demanding group of clients in the world, when it comes to anti-wrinkle and anti-aging skin care treatment. Period. Because no other occupations require quite the same dedication to upholding one's appearance (*in body as well as skin*), as do these fields. So **South Beach Skincare** obviously know their stuff when it comes to anti-aging skin care treatments.

But their head-honcho, Amit Suneja had not heard about this amazing non-surgical face-lift, inspired by Nobel Prize winning research. At first he seemed skeptical when I told him about it. But he still said, "I'll look into it, Michelle."

To my pleasant surprise he took me seriously. After that, dermatologists, doctors, pharmacists, and chemists intensively researched this formula and claimed...

Youthful Skin at Any Age
- A Promise Backed by Scientific Proof

"Plain And Simple – It Really Works!"

But what specifically does it do?

Get this: It works to erase the appearance of **ALL** the visible signs of aging...in the fastest amount of time humanly possible. Specifically, it works wonders towards putting back the "youth" in your skin by:

- Dramatically improving the appearance of photo-damaged skin
- **Protecting your skin from the future signs of aging**
- Revitalizing your skin
- **Eliminating the appearance of lines and wrinkles**
- Improving skin's firmness and elasticity
- **Removing the appearance of unsightly "crow's feet"**
- Re-energizing your skin, resulting in it looking and *feeling*, firmer and smoother
- **Evening skin tone, and brightening its appearance**
- Diminishing and bleaching the appearance of age-spots
- **Reducing the appearance of dark circles and puffiness around the eyes**
- Dramatically making your lips look plumped up and provocatively pouty

Think about it: This all makes **LifeCell** the **world's first ALL-IN-ONE Anti-Aging Treatment**. It's a Fast-Acting Anti-Wrinkle-Cream, **Firming-Cream**, **24-Hour Moisturizer**, **Age-Spot Reducer**, **Corrective Under-Eye Treatment**, **Lip-Plumper** and **Makeup Base**! All you need is this one wonderful topical treatment on your dresser for all purposes. You can practically throw away the others and just use **LifeCell**!

Skeptical? Now You're Talking My Language...

Never, ever believe anything because someone swears it works. Make them prove it, like I'm going to right now...

But before I do, let me share with you something that (*I promise*) will make your day!

You see, if you're impatient like me, you

"Now No One Believes I Am 70. I Have To Show Them My Driver's License To Prove My Real Age"

might say...NO...you can't wait for even a few weeks for your new beautiful flawless complexion to show-up. You believe we live in the blazing-fast jet-age and want results...

"NOW!"

Okay, fair enough. **South Beach Skincare** has added an ultra-advanced (and *super expensive*) ingredient to *all-in-one* anti-aging **LifeCell**, originally created exclusively for their celebrity and European Royalty clients. **It's the same ingredient these folks use as a "Secret Stealth Weapon" to *vanish* the appearance of wrinkles *within* 60 seconds when they have to be "on stage" for those red-carpet occasions.** This ingredient "magically tricks" the eyes...to make wrinkles disappear in the same amount of time it takes to...

"Blink!"

Well it's not exactly a "magic trick." It's science, which "**appears**" magical. This "magic ingredient" is silicon dioxide in the form of...

"Billions Of Microscopic Three-Dimensional Crystals!"

So what?

Here's "so what": Almost nobody knows this...but...the human eye *cannot* see a wrinkle. What the eye sees is actually the *shadow* made by the wrinkle. And, since all those billions of microscopic silicon dioxide crystals refract light, when you use this cream...

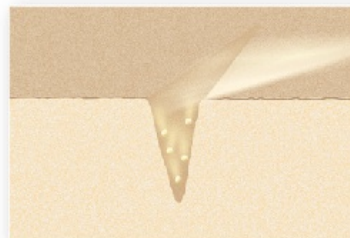

"There Are No Shadows To See!"

This invisible effect will last until you wash your face and the cream is removed.

 **WARNING! Don't let this "needle-free" anti-wrinkle therapy make you look too young**

What makes lines and wrinkles "visible" is their darkness against the rest of your skin. No matter how fair your complexion, these tiny crevasses stand out. Why? Simply because of the shadows cast by the edges of the lines and wrinkles.

South Beach Skincare's revolutionary technology gets rid of the shadows. That would get rid of the contrast that makes lines and wrinkles so visible. And that would make them appear to vanish. Not six weeks from now. But immediately. An Instant End to Lines and Wrinkles.

Getting excited? Good. I'm just warming up. It gets better. Much Better!

Because of the amazing way, anti-wrinkle **LifeCell's** groundbreaking formula works... you can be darn certain the appearance of...

Sugie Lee
Cosmetic Pharmacist
(Click To Enlarge)

I'm 70 years old. And I've been a pharmacist for dermatologists and other doctors for more than 30 years, I have seen very few anti-aging & anti-wrinkle creams that have any positive effect on our skin.

However, one cream that specially stands out of the pack is **LifeCell**. It has really impressed me. It is so convenient. It's an all-in-one fast-acting anti-wrinkle cream, firming cream, 24-hour moisturizer, age spot cream, eye-gel, lip-plumper and makeup base. I am not aware of any other cream quite like this. I've thrown away all the other creams I had, and just use **LifeCell**. It does everything... why would I need anything else?

How to stop NEW wrinkles cold?

I've been using it for some time and now no one believes I am 70. I look about 15 years younger. I have to show them my driver's license to prove my real age. In fact, my own personal results have been so satisfying that I will continue to recommend **LifeCell** to ALL my friends who would benefit from looking younger. Thank you!

"She Was Like: Oh My Gosh! Your Skin Looks Great!"

I'm 36 years old and I recently started using **LifeCell**. My mother and

"Smooth Wrinkle-Free, Baby-Soft Skin Doesn't Wash Off Once You Remove The Cream!"

And I'm going to share with you exactly why and how the exciting ingredients in **LifeCell** make this possible! Not only that, I'm also going to let out the *awe-inspiring* mountain of unquestionable groundbreaking scientific research backing **LifeCell's** formula...and the magic it produces on our aging-skin.

But first, I'm going to take a very small but extremely important detour.

I will finally reveal something that has the potential of stopping you from being a victim of *broken-dreams*. You see, in a second **I will forever expose the *dark* medical secret of why almost ALL anti-wrinkle and anti-aging skin care creams do NOT produce the results... their multi-million dollar advertisements claim they do.** In fact...

aunt noticed right away. She was like, 'Oh my gosh! Your skin looks great.' My biggest compliment has just been women that I interact with saying, 'Wow. You have really beautiful firm skin for someone your age' I still can't believe it 'til this day. Approaching forty I feel like I know myself and I have confidence in myself and my ability. But using **LifeCell** has given me more self-confidence in how I appear to others and how, you know, my appearance is in the world.

"Some Are Downright Dangerous To Your Skin And Can Cause The Very Wrinkles They Promise To Erase! Some Alarmingly May Even - Cause Cancer!"

They're just JUNK ANTI-AGING COSMETICS...based on JUNK SCIENCE. It may look like the real thing, but when you see what it actually does to you, you'll be appalled. While masses of women (*including me at one point*) meekly submit to these pseudo-science SACRED COWS, no one dares to ask, 'WHY? HOW COME? SAYS WHO?'

But I'm going to ask all those questions *right now* and you're going to love the REAL ANSWERS...and...have the last laugh on these jokers. So why am I swinging this axe?

"Well, I Got Sick And Tired Of Being A Human "Guinea Pig" For Fat-Cat Cosmetic Companies Who Don't Understand - And Don't Care - About SERIOUSLY Erasing ALL Signs Of Facial-Aging!"

**"Pay Attention Now -
This Is Really Important!"**

We "look old" because of **wrinkles, lines, skin blotchiness, age-spots, loss of skin radiance, sagging skin** (*a big one*), **"feather" lips, under-eye puffiness** (*a dead give-away*), **crow's feet** and **thinning lips**. On a biological level, skin-aging is caused by: free-radical damage, changes in fat content of skin, changes in skin collagen, dehydration, DNA changes, degradation of the elastin polypeptides and certain disorders in the packing of the lipid matrix of the skin.

In short, any anti-aging skin care cream, that doesn't attack ALL the problems (*tell-tale signs as well as biological changes*) associated with skin-aging has *no hope* other than being an *ineffective quick-fix*...a band-aid on a bullet wound, so to speak. Anyone who tells you differently is L-Y-I-N-G.

Shockingly though (*and despite it being scientifically possible*), almost **NO** topical anti-wrinkle cream made by the fat-cat cosmetic companies attacks **ALL** the "tell-tale signs" or "biological changes" associated with aging-skin. (***You might want to read that again***)

I guess, they "expect" us to slather our faces with 10 to 15 different anti-aging creams at once, each tackling a "different" biological cause of facial-aging? For example, one cream for fighting free-radical damage, one for collagen depletion and so on and so forth... But wait! Then they expect us to buy a moisturizer, firming serum, under-eye cream, anti-wrinkle cream, night cream, day cream, age-spot reducer and so on... and slather all these creams on our faces at once. And

finally, after we've almost ended up selling the farm to buy this stuff, they "say" we have a "chance" to look young.

Listen up: I've got news for you. The way anti-wrinkle & anti-aging skin care cosmetics are sold right now, unless women are determined to spend the rest of their lives applying 20 to 30 creams (*everyday*) on their faces...each tackling a *different* problem associated with skin-aging...they are without much hope. And I believe, if someone does have that kind of determination and time (*no matter how filthy rich they are*), they don't have a life, are clinically insane and should be admitted to a mental asylum immediately!

What most of us *normal* women end up doing is applying a few creams that treat or "hide" a few problems associated with skin-aging. And then we "hope" for the best, right? But at the *very best* we end up getting "Heartbreaking Results." The majority of us suffer from them – for every skin-aging problem we attack, we're leaving several unattended to. We end up missing out on the wonderful youthful skin we "*could*" be having.

Worry Not! In just a few minutes you can throw away ALL your anti-aging cosmetics and yet reverse the appearance of almost all the "visible-signs" of skin-aging. I promise! I'll tell you how anti-aging skin care cream, LifeCell, can do this without expensive surgical face-lifts or painful and sometimes harmful Botox injections...

How I lost the appearance of my wrinkles without botox or surgery...

But first, I guess you might want more proof on how the fat-cat cosmetic companies take us on a "wallet-emptying ride" and yet, short-change us on the thrill?

You do? All right. You asked for it.

Hear me out! In the last issue of Vogue Magazine I saw, there were sixty-three advertisements for anti-wrinkle & anti-aging creams. **Sixty-three!** And each ad claimed its product was the "best" in the world.

Now, I ain't no genius, but I know they can't all be the "best."

Almost all the ads claimed at least a 50% to 80% wrinkle reduction in one month! (*verified by mumbo-jumbo sounding "clinical studies"*). Gosh, three ads claimed "clinical studies" showed 97% of women who used their cream noticed a reduction in wrinkles.

97%? Yeah sure. Really? Wow!

Reading these ads makes you believe wrinkles should be as much a part of history as dinosaurs. Yet when we use these anti-wrinkle creams with dreams of wrinkle free skin...our dreams almost never come true.

Why, you wonder? Remember these two all-important words, "independent" and "published."

When it comes to ***REAL*** scientific research, scientists *only believe* in independent studies published in reputable "*peer-reviewed*" medical journals. Yet, almost **NONE** of the cosmetic companies conduct independent studies on the efficacy of their anti-aging skin care products to fight wrinkles and other tell-tale signs of aging like: sagging skin, age-spots, under-eye puffiness/dark circles, "feather-lips" and so on. They fear that being the center of attention under the broiling lights of *true science* might expose the *real facts*.

"You Don't Ever Want To Be Without The Amazing 'Face-Lift-In-A-Tube' Used By Madison Avenue Models Who Don't Want To Go Under A Surgeon's Scalpel!"

**Barbara Cook
Model & Actress
(Click To Enlarge)**

That's how I feel about **LifeCell**. I don't ever want to be without it. I would say, try it. You have nothing to lose... Try it and see if it works for you... When I look at my face in the mirror I'd just be like, 'Wow!' I care about what people think about when they see me and after using **LifeCell**, I am sure that people see me differently than they would have.

Wish someone told you, "You look 15 years younger than your age, dear!" Stop wishing and find out how

Because of the confidence that I have... just my natural skin without make up, I'm sure that I carry myself a little bit differently... **LifeCell** has just given me a perfect anti-wrinkle treatment for my skin. I just feel so good about myself.

Like I always admired people who can just be like, 'Fresh face for the world.' You know? A little bit of color here and here and then just run out. Well, that's where I am now... It just feels awesome. It feels wonderful... Every day I use **LifeCell**. Every day I get complimented. Every day I remember what it used to be and every day, I'm thankful for what I have now.

**Barbara Cook, Age 30
Hollywood Actress**

What real facts?

Independent "studies might show their products are worthless"! says world-renowned Dr. Loren Pickart, author of *Reverse Skin Aging*.

Oh, instead, they report "brief studies" on very fine (*barely visible*) wrinkles conducted by their in-house *paid* lab technicians (*how un-biased and objective is that going to be, huh?*). Worse, these are uncontrolled studies that are never (*NEVER!*) published in medical journals (*so no one can review them*). **"Everything succeeds in these studies," says Dr. Pickart.** Heck, by moisturizing the skin a little (*even with water*), wrinkles are less evident. Ingenious, huh? Once I discovered how they "fool" us into believing their stuff works... I **NEVER** looked at these disgraceful "clinical studies" with seriousness again.

So it came to me as a pleasant surprise that a groundbreaking series of independent, published studies demonstrated without a doubt the amazing effectiveness of LifeCell's anti-aging ingredients on our skin. **Most of the research has been conducted by Harvard, Yale, Cornell and Oxford University's medical departments. And as I've already said, one of the anti-aging ingredients in LifeCell produces a Nobel Prize winning molecule that does absolute miracles for our skin.**

➡ **World-famous fashion models use anti-aging LifeCell. Why not you?**

I'll be sharing some of these jaw-droppingly awesome studies with you once I spill the beans on the ingredients, but first lets share a serious moment together...on...

"Crossing The SACRED Line Of Trust!"

Pay very, very careful attention here. What you are about to discover will not only save you a lot of money, but also save you from feeling conned into emptying your wallet.

In Vogue magazine (*and even on TV infomercials*), I noticed a flood of ads by medical doctors pedaling their own branded skin care lines. These doctors are telling us their anti-wrinkle and anti-aging skin care products are the way to go for the fountain of youth, and it will cost us a pretty penny (*in fact, lots of pretty pennies*) to make it all happen.

What's wrong with this picture? A lot.

Listen: Call me old fashioned in my values, if you want. But I'm going to pull the devious rug out from under the unethical profit-driven salesman...disguised as a doctor.

I believe it's completely reasonable to expect our doctors to be objective and impartial when it comes to giving us advice on various treatments. However, their objectivity is disturbingly questionable when the only option presented to us as a cure is their *own* anti-aging skin care product.

"When Morality Comes Up Against Profit

"Stop Lying About Your Age, Boast About It – And Smile When Their Jaws Drop In Amazement... Jump Out Of Bed In The Morning, And See Yourself A Decade Younger In The Mirror"

**Bobbie Pollard
Licensed Cosmetologist & Skincare Expert
(Click To Enlarge)**

(If you're part of Las Vegas's select "who's who" then you know Bobbie Pollard. If not, then you are either a tourist or still haven't "arrived." Bobbie happens to be the most sought after, licensed cosmetologist and skin care expert in Sin City.

A good friend of mine described Bobbie's makeup and skin care skills as "borderline illegal" and sinful. Not that Bobbie breaks any laws but her makeup skills are so dramatically transformational that people's faces are almost unrecognizable once they go under her magical hands. Bobbie can take a plain Jane and within minutes transform her into a devilish traffic-stopping-beauty.

Specializing in Bridal makeup, Bobbie's also created beautiful faces for a wide variety of movies, beauty pageants (including Miss Hawaiian Tropics), portfolios, live performances and special events.)

Listen to what Bobbie has to say...

When new clients come to me... they have only a few short weeks before they are to get married. They don't have time to be put on a skin care regimen for months at end before they see the disappearance of their lines and wrinkles.

Most of them are screaming "I need laser therapy, Botox, Collagen – do something quick!!"

➡ **Discover age-reversing secrets of America's youngest looking women**

But when they find out about the pain and costs involved with those invasive procedures... most realize it's not for them. What they really want is a safe, easy to apply facial treatment, if one even exists, that they can use at home that really works...that would zap 5 to 10 years from their facial appearance very quickly!

In my quest to satisfy my client's need, I've tried almost all anti-wrinkle creams, and constantly speak to research scientists about the latest ingredients they contain. Most of the anti-wrinkle creams do not lessen wrinkles or improve skin texture, let alone fulfill the more extravagant promises on the label.

Up Against Front, Unfortunately It's Seldom That Profit Loses"

Imagine for a moment, on Halloween your best friend dressed up as Superman. Would you believe she could fly? Of course not. Because you know she is just playing a role, right? By the same token, once a doctor crosses the sacred line from physician to cosmetics-pusher he no longer has the medical ethics and scientific objectivity to provide us with effective treatments. He is now a salesman disguised under a doctor's coat!

"Don't Let The Slick Salesman In The Garb Of A Doctor's Coat Pull The Wool Over Your Eyes!"

What all these doctors have in common is they sell expensive anti-wrinkle and anti-aging skin care products while making exaggerated claims about what their products can do. Yet, repeated scientific tests show the physician's involvement although "seen" as giving medical credibility to their anti-aging products...end up being no different in any way from other anti-aging skin care products. The only difference is, if it sounds like magic and comes in the guise of medical authenticity, the cosmetic salesman's (*disguised as a doctor*) pocket is now hundreds of dollars heavier and our vanity tables are lined up with products that don't live up to their claims.

Guess how many doctors and pharmacist's palms South Beach Skincare has greased with green-backs to get their testimonials or endorsements for "all-in-one" anti-aging **LifeCell**? None. Not one dime! All the fabulous, but 100% true endorsements, testimonials and case studies you'll read in this letter are totally unpaid for. All the doctors and pharmacists that have raved about anti-aging **LifeCell** have done so...for one reason and one reason only - It Works Wonders!

**Clicking here might dramatically make you look younger
for life (stunningly) without going under a surgeon's scalpel**

Keep reading because I'm going to tell you how cosmetic companies tell us half-truths...the untold half of which could cause you serious problems...

"The Art Of Half-Truths"

Some ads in Vogue claimed, our bodies produce toxic free radicals that cause wrinkles (*true*) and using anti-wrinkle creams containing antioxidants will eliminate free-radicals. Yes again, this is true.

But I bet you didn't know, and what fat-cat cosmetic companies *conveniently* *forgot* to tell you that there are MANY different kinds of free-radicals, and all have SPECIFIC detoxifying antioxidants. For example, the singlet oxygen radical is quenched by beta carotene, the peroxy radical is quenched by Vitamin E, the hydroxy radical is quenched by glutathione, and the dangerous oxy radical can be quenched by Ubiquinone.

However, one skin care product that truly stands out in my mind is called LifeCell.

I have to admit, when I first heard my friends raving and ranting about this new skin care breakthrough, I was a skeptical. There was only one way to find out: try it myself. So I did.

First it felt a bit warm, then it felt a bit tight. Finally, it felt as if it was being gently tweaked backwards. It was unnerving. I could actually feel the plumpness around my eye. It felt more firm.

My friend Christine, was with me and she was convinced that my face had lifted. To my astonishment, so was I. If it can do that in a matter of a few minutes, what might an ongoing course achieve? What might I look like after a couple of months? I was excited.

On doing some research I realized **LifeCell** is an "all-in-one cream" that reduces the appearances of wrinkles, lines, crow's feet, dark-circles, age-spots, puffy eyes, frown lines, sagging skin, and "feather" lips. There is nothing quite like it in the market for whatever amount of money.

Why? Because it's loaded with antioxidants, water-binding agents, and anti-irritants. A staggering amount of scientific research has proven without a doubt that these anti-aging ingredients are extremely beneficial to reduce the tell-tale signs of aging on our skin.

Ever since I've started applying **LifeCell**, I can't stop getting complimented enough on how radiant and youthful my skin looks and feels.

And I feel my long search for the perfect anti-wrinkle cream for my clients and myself has finally been met. Now, all I have to do is hand my clients a tube of **LifeCell** and tell them to apply it for a few short days. Viola! Most of them have to pinch themselves to believe the dramatic results they see in the mirror.

When I give my clients a tube of **LifeCell** I tell them, "Stop lying about your age, boast about it - and smile when their jaws drop in amazement... Jump out of bed in the morning, and see yourself a decade younger in the mirror."

"Do Yourself A Favor And Get LifeCell - I Promise You Will Not Regret It"

My name is Sally and I'm 33 years old. I moved down to South Florida from New York City about 3 years ago. And I spend a lot of time out doors here and the sun can be quite damaging to the skin. Also as I get older, I've been thinking about taking better care of my skin and I've been searching for the perfect anti-aging cream. Everything I've come across the in the mall and informercials really didn't work for me. All I got were empty promises in a bottle.

**Sally Koo
Investment Representative
(Click To Enlarge)**

Click To Watch...

Aha! But **there is NO anti-aging or anti-wrinkle cream on the market that will fight all the free-radicals...that cause skin aging.**

None. Zilch! Not one! (And I'm not even talking about attacking the rest of the causes of aging beyond free-radical damage...through the **same** cream) Why aren't there any anti-aging creams available that will seriously detoxify all free-radicals?

The Answer Is Simple: "Profit And Greed"

You see, it simply costs too much to use all the really quality antioxidants that do everything the fancy ads in the magazines say their products do. With the huge profit mark-up most cosmetic companies insist on, they're afraid they couldn't compete with the cheaper anti-aging skin care products already on the market. So they cut costs on antioxidants (*and other ingredients*), and – worse – leave out crucial anti-aging ingredients that are too costly (*regardless of how necessary they are in making our skin look younger*).

Why Don't Cosmetic Companies Use The Good Stuff?

They're too expensive, that's why. Including them would hurt their "precious" 500% bottom-line profits!

Top pharmacists will confirm this fact. For example, one pharmacist told me most anti-wrinkle creams on the market just put in a pinch of an extremely important antioxidant: Ubiquinone – only enough to legally be able to say they have it in their formula! They ignore the fact that ten times that amount may be needed to effectively fight wrinkles! They almost never use the good anti-wrinkle stuff if a cheap alternative is available, either – again, regardless of how much less effective the cheapo is!

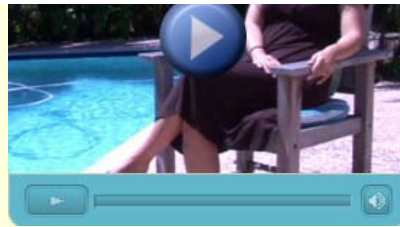

So women like you and me are out there buying and pasting our faces with cheap moisturizers (cheap for the fat-cats to make), synthetic Vitamin E that looks lazy next to the real stuff, poorly formulated Vitamin C that cannot even be absorbed into our skin...and we wonder why nothing ever happens.

And Listen, on the topic of Vitamin C (L-Absorbic Acid) there is at best a potentially disastrous-half-truth being told. Vitamin C is a great antioxidant when taken orally. But, some researchers believe, topical Vitamin C actually produces a dangerous free-radical, hydroxyl which when it comes in contact with iron (*and your skin is loaded with iron*) causes skin redness and irritation.

What's Going On Here?

The fat-cats told us Vitamin C was "supposed" to kill free radicals. Talk about paying good money to go from the frying pan to the fire. Almost all skin care creams use Vitamin C in the form of L-Absorbic Acid...instead of the extremely effective form - Ascorbyl Palmitate (*smile, it's included in LifeCell*) that has no such (*ahem*) "side-effects."

The behavior of the fat-cats is unconscionable. All those cosmetics' company executives who

I finally found LifeCell. This cream is amazing. It has everything in one tube... anti-oxidants, firming cream, anti-aging, day and night cream... all in one... very convenient. I've gotten so many compliments from friends and family. I've passed it on to my girlfriends and my mother and they all love it. Do yourself a favor and get LifeCell. Just try it. I promise, you will not regret it. You'll never go back to anything else.

"LifeCell Is A Skin Saver!!"

Maurio Coito
Flight Attendant
(Click To Enlarge)

My name is Maurio Coito and I'm 45 years old. I have been a flight attendant for the last 20 year.

Because of the radiation and stress of long cross Atlantic flights I get dark circles under my eyes, and blemishes on my skin. As I get older, my skin does not bounce back so quickly, from the stress and crows feet have started to show... and my darks circles now have bags.

Then a friend of mine introduced me to **LifeCell**. I was skeptical because I was not looking for oceans of lotions to work on my face. I don't have time for that kind of aggravation. Too many other skin care treatments just did not work for me.

I only have one face and I want to care for it the best way I can. I wanted something that would reduce my pores, lighten the appearance of my dark circles and blemishes, soften the texture of my skin and reduce the appearance of lines and wrinkles that are age telling.

I was pleasantly surprised **LifeCell** did all of it. And it left me with a more youthful face. **LifeCell** is truly a Skin Saver!

Maurio Coito, Age 45
Flight Attendant
Maui, Hawaii

willingly sell us anti-wrinkle products they know are dangerously harmful should be put in jail and the keys thrown away.

Are you angry yet? I sure was. I was fuming when I found this out.

Worry Not! I'll soon be cheering you up! I feel bad telling you the truth (*although I wouldn't have it any other way*) but trust me...I have good news for you...which will blow your mind away. Scientists have discovered one universal antioxidant that (*although extremely expensive*) quenches ALL types of known free radicals...and it's backed by solid scientific research. Not only that, this antioxidant actually enhances the production of other antioxidants produced within our bodies to reverse the visible signs of aging. I will spill the beans on this...real soon...because it's included in **LifeCell's** formula I (*gulp*) accidentally discovered.

Don't wait another moment, look up to 20 years younger now! Or get your full money back!

But for now I'm going to be telling you about something that you can apply on your face until the cows come home, but it wouldn't do a thing...because it's intended to make your money, not wrinkles, disappear..

"Moo!"

Here is the potential scam: Collagen is often added into "expensive high-end" anti-wrinkle creams. Collagen is naturally produced in our skin, and gives it its strength and elasticity. As we age our skin's ability to replace damaged collagen diminishes. This process eventually leads to wrinkles...so logic would say its supplementation would help regain our skin's youthful looks, right?

No wrong.

Collagen in most anti-wrinkle creams is derived from either cattle (*bovine*) or bird (*avian*) sources. **Collagen in anti-wrinkle creams cannot (once again, cannot) penetrate the skin.** And thank God it cannot – otherwise we'd all have perpetual allergies.

Let me give you an analogy. Imagine you live in a brick house and your neighbor is throwing bricks at it. Will your walls become stronger or smoother? Of course not: those bricks will simply lay scattered on the ground.

The same happens when you apply an anti-aging collagen cream. Collagen is a **LARGE** molecule, it does not penetrate the skin but stays idly on top of it, only to be washed off during your next shower.

Listen to what Dr. Rubin revealed in an article in the New York Times:

"Collagen doesn't penetrate," Dr. Rubin explained. "You can't get the collagen molecule into your skin. It's like taking a steak and rubbing it on your skin to try to make your muscles large."

Anti-aging skin care products containing collagen may also potentially expose you to the dangers of "prions", the carriers of "Mad-Cow Disease", a condition which causes progressive brain degeneration...or worse, "Bird Flu" which causes death. Remember, only collagen produced within our skin helps improve skin firmness and elasticity.

But Relax!

"It Satisfies All My Anti-Aging Skin Care Needs!"

Karen Winselman
South Beach Skincare age 47

Hi my name is Karen and I'm a certified Pilates instructor. I've always been interested in health and fitness. And I'm always looking to find ways to make my life simple. With an active lifestyle I was interested in a cream or a product that was going to help me get rid of the appearance of my little wrinkles. Firm my skin. And keep my skin toned and moisturized.

And I came across **LifeCell** about a year ago. It's truly an amazing product... one that's really met all of my goals. I've been able to use just **LifeCell** to moisturize my skin. Besides its anti-aging light reflecting nanoprisms reflect away light from the shadows formed by the little fine wrinkles around my face. I've received lots of compliments from my clients. **LifeCell** is a really great product. I highly recommend it to each and everyone.

**Karen, Age 47
Fitness Instructor
Chicago, IL**

I'll soon share with you exactly how your body can produce its own Collagen. One of LifeCell's anti-aging ingredients helps to do exactly this.

Now let's talk real quick about the grand-daddy of all money "disappearing" products...sold to you based on fear...by the...

"Sun Scare Nazis!"

Some ads claim wrinkle formation can be stopped if you protect yourself from sunlight...by using their sun-protection cosmetics or sunscreens. Their scare tactics go even further...they say sunshine causes skin-cancer...and sun-screens protect us from cancer.

"What Are We, Mushrooms?"

What a bunch of crock! Let's smell the coffee on this one: You can hide from sunlight until you evolve into a mushroom but this will NOT keep your skin young and vibrant. Yes, avoiding massively excessive UV light will reduce some types of skin damage as you age, but you will still end up with pasty, grayish, lifeless, pale skin. Sitting in a dark room for years did not help brilliant industrialist and movie producer, Howard Hughes's skin, and doctors seriously doubt it will help your skin. (Source Dr. Loren Pickart Author of Reverse Skin Aging)

Besides, a certain amount of sunlight on our skin may be necessary. Sunlight activates a gene, which enhances our **sex-drive**, and the endorphins or "happiness hormones", and leptin, which helps burn fat to *keep us slim*...and the best part is...it's FREE. (Do you want to give all this up and instead sit in a dark dungeon, as the "powers" almost suggest you do?) Of course not.

Here's more: Sunlight produces vitamin D in our bodies. Lack of sunlight can lead to severe depression. Vitamin D deficiency can also be a serious health problem, by blocking the absorption of calcium and phosphorus, causing a chronic imbalance and bone deterioration.

And get this: In the US, people who have high sunlight exposure (farmers, mail carriers) live the longest!

Mom was right. Turn off the TV, go find your swimsuit...and live a little. But just don't jump out of the frying pan and into the fire! I'm **NOT** suggesting you spend the whole day on the beach slathered in baby oil.

The **KEY** is to find a way to enjoy the sun while reducing skin damage. Dr. Martin Rieger says moderate sun tanning (*20 to 30 minutes per day*) over a number of days produces pigment (*melanin*) in the skin. The buildup of melanin helps block ultraviolet rays and also serves as a powerful antioxidant. Remember, antioxidants are the ***good guys*** because they kill those *villains* — wrinkle producing free radicals.

But What About Using Sun-Blocks To Protect Us From Skin-Damage?

Well, here's something that gave me goosebumps: Most sunscreens do little to really protect our skin. In one study, the average UVA protection from a wide range of brands was only 23%. But wait. Here's the bummer: The average protection on brands not making the claim was 37%!

What About Claims That Sunlight Causes Cancer?

Shockingly enough, just the opposite might be true. No – I'm not off my rocker. Before you say I'm crazy, let's do a little sanity check...

Scientists conducted studies in the sunniest parts of Australia on lifeguards. They bake in the sun all day, yet they have the nation's lowest rate of skin cancer. If you're wondering who gets the most skin cancer, it's all those sunlight-deprived office workers. US cancer rates are highest in the northern states with the least sunshine and lowest in sun-drenched states of Utah and Hawaii. Researchers all over the world believe, as sun exposure increases, malignant skin cancer risk goes down. That's right. (Sources: Dr. William Douglass - named by National Health Federation - "Doctor of the Year," Cancer Journal for Clinicians)

You Want To Know The Most Shocking Piece Of News?

Mountains of evidence claim sunscreens cause cancer! Huh? What? Yes. Get this: Dr. John Knowland of Oxford University reported studies concluding sunscreens can damage

DNA...that can lead to cancer.

And mind you, these aren't some "fringe" scientists sitting in some dingy lab claiming a far-out "alternative" opinion. *Nuh-uh!* There is wide consensus in the medical community about the harmful effects of lack of sunlight, most sun screens...and EVERYTHING else I've told you about.

Ask Your Doctor And He'll Confirm ALL The Above Facts!

The Bottom Line

Here's what I think. Once again, for God's sake whatever you do...don't go and roast in the sun for weeks together. **OK? PLEASE!** At the same time don't stop living and hide in a dark cave for years. Live a little! **PLEASE!** It's just common sense, really. And look for sun blocks (*it's worth writing this down*) containing Zinc Oxide or Titanium Oxide. They don't cause cancer, they lie on top of our skin and are not absorbed. They prevent nearly all UVA and UVB, rays from reaching the skin. I believe you should throw away the rest of the stuff because at best it's junk and at the worst it can be dangerous. Throw it away!

"The Almighty Dollar!"

Fear of the sun, scaring us about wrinkles and skin cancer, is a multi-billion-dollar industry led by greedy Sun-Scare-Nazi cosmetic companies who want to sell us ineffective sunscreens. The fat-cats have drowned REAL SCIENCE in their noisy and misinformation based multi-million dollar advertising campaigns.

Anyways, I hope by now, you are starting to see how many "tricky", dangerous and at times *deadly* anti-aging cosmetic FALSEHOODS have been promoted as FACTS, just by being endlessly repeated? Yes? OK, great!

**No injections. No needles. No kidding. Just
youthful skin, fast. Or get your full money back!**

"Now Let's Flip The Coin... To Finally Reveal The Forbidden Secrets The Powers Do Not Want You To Know That Lead To Radiant Youthful Skin!"

**There's another side to this coin. Just as many REAL ANTI-AGING COSMETIC
BREAKTHROUGHS that could erase 10, 15 and even 20 years off your appearance are being
ignored.**

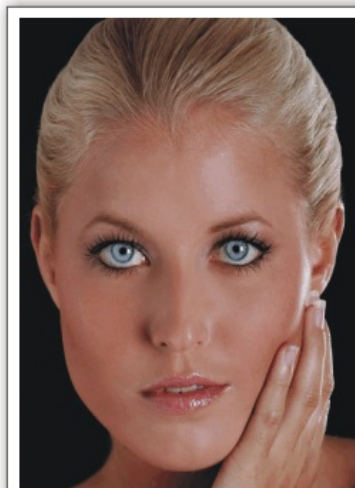

Because if delivered to you...the fat-cats would have to stop selling a million different products they bring out each year...each claiming...it is THE cure to wrinkles, lines, age-spots, dark circles, under-eye puffiness, free-radical skin damage, dry skin... etc. How could they sell you 10 to 20 different useless or incomplete creams when only ONE honest to God "all-in-one" cream can do it all.

Fortunately science exists today that with only one tube you can solve a BIG chunk of the problems associated with aging-skin. And this is exactly what I discovered by a pure stroke of luck...through LifeCell.

This "all-in-one" anti-aging formula is truly **THE** answer to regain your skin's youthful bloom.

Why Is It THE Answer?

Here's why: **LifeCell's** "all natural formula" contains 6

**LifeCell's Your License To Stretch
The Truth On Your Anti-**

of the most potentially effective, (yet completely harmless), scientifically proven anti-aging ingredients to dramatically revive your youthful appearance, possibly completely erase the appearance of wrinkles, tighten your skin, zap 10 to 15 years off your appearance, and get you a glowing radiant complexion...for LIFE...because...it attacks...ALL the known causes of skin-aging.

The Truth On Your Age!

And Guess What The Best Part Is?

There's no need to spend 100's of dollars a month on 10-15 different anti-aging skin care products...that if you have a normal life, you wouldn't apply everyday, anyways.

No need for painful and expensive surgery.

No need to get your face cut-up by a surgeon's bloody scalpel

No need for painful, risky and at times dangerous injections.

No need for costly doctor's prescriptions.

Click here to get \$400.00 worth of bonuses absolutely free!

This is why, anti-aging **LifeCell's** discovery is making the fat-cats shiver in convulsions.

Will they? I don't know. Time will tell... But I do know this... **to call anti-aging LifeCell's "all-in-one" formula an "improvement" on other anti-wrinkle or anti-aging creams is as ridiculous as calling the light bulb an improvement on the candle.**

The genius of this anti-aging formula is it works "synergistically." Which means just as talent can win games, but teamwork and intelligence wins championships...similarly **LifeCell** involves the simultaneous action of separate super-powerful anti-wrinkle and anti-aging ingredients which together end up having... a greater total powerful effect.

Pretty good, right? Alright, now take a deep breath.

Here's The Scientific How And Why On The Ingredients In LifeCell And The Wonders They Do For Our Skin...

To understand how it works, I'd like you to remember, the time in the gym when your adrenaline was flowing and your face had a youthful bloom. Or imagine yourself stepping out of a relaxing (like you're in *Sensual-ville*) sauna or hot-tub and noticing your skin full of amazing new life. Or fantasize about the time when your face was flushed with a **sex-glow** after you had passionate sex with your lover. You might have even said to yourself...

"I Wish My Skin Could Look And Feel Like This All The Time!"

Well excitingly enough, now it can!

Quite frankly, LifeCell's revolutionary fast acting "needle-free" anti-wrinkle system is not for every women. Is it for you?

What happened was your blood capillaries got dilated or

Under penalty of perjury, we formally state that the following comments are from REAL customers and REAL medical professionals. See if anyone else is willing to say that about their testimonials. They can't, because theirs are FAKE. If you have a REAL testimonial, send it to testimonials@lifecellskin.com

When I first found out about **LifeCell**, I had already been using another extremely popular stretch mark cream on my face that smelled awful, felt really greasy, broke my face out in a rash and basically didn't work.

I complained about this to a friend who happened to know someone at South Beach Skincare. As luck would have it, I was given a sample of this, at that time, unreleased All-In-One **LifeCell** "super-cream" with the understanding that if I liked or disliked the product, they would appreciate any feedback that I could give them.

Firstly, there's nothing to dislike about **LifeCell**. It has a really silky texture, is completely non-greasy, didn't break out my face and most importantly, it works!

You know, the nanoprism crystals work instantly to hide wrinkles by reflecting light away from the wrinkles! I don't know of any other cream that does this so well!

After about 2 weeks, I noticed a definite improvement around my eyes and mouth. People started to tell me my face was glowing. After using **LifeCell** for 2 months, I was so in love with the product that I was trying to figure out a way to charm more samples out of the company. They were such nice

widened. Blood capillaries are the network of tubes through which our body transports fresh blood and nourishing nutrients to our skin and other organs. When your blood capillaries dilate your skin is flooded with fresh blood cells...full of nutrients.

This Gives You The Healthy Teenager "Glow" We All Desire.

As we age our blood vessels (and microcapillaries) become damaged – clogging-up delivery of fresh nutrient filled blood to the surface of our skin. So, instead of blood flowing to our skin like a raging river as it did in our youth, it moves more like a stagnant sludge. Our skin STARVES for fresh nutrient-filled blood cells. Because of diminished blood flow and nutrition hunger...our skin tissues get damaged, lose their natural glow, end up with blotches, age spots, wrinkles and start to "look old."

Wouldn't it be absolutely wonderful if we could dilate our capillaries to speedily transport more nutrient-filled blood cells to the surface of our skin?

Well guess what? Lucky you - lucky me. In 1998 three Nobel Prize winning scientists (Robert Furchgott, Louis Ignarro and Ferid Murad) discovered such a groundbreaking compound called Nitric Oxide that does just this. Scientists are so excited about Nitric Oxide that research is yielding **3,000 independent published** scientific papers (remember independent and published?) a year proving its efficacy. In medical journals Nitric Oxide was voted as the **"Molecule of the Year"** for its amazing effects. While the findings have astonished some scientists, they have opened the floodgates to unheard of possibilities for our skin...

people that they said I could have more samples as long as I consistently used the product. They just took me on my word, which was really nice. Incidentally, they never asked me for anything in return other than my honest opinions. I felt compelled to write this because this is just a fantastic product from a fantastic company with great people.

Youthful Skin at Any Age
- A Promise Backed by Scientific Proof

The Nobel Prize in Medicine

Robert Furchgott **Louis Ignarro** **Ferid Murad**

In 1998 three Nobel Prize winning scientists (Robert Furchgott, Louis Ignarro and Ferid Murad) discovered a groundbreaking compound called Nitric Oxide. Nitric Oxide dilates our capillaries and increases healthy blood circulation to our skin. The enhanced circulation helps bring with it a flood of nutrients saturating our malnourished skin...with new life. Our face ends up regaining its bright youthful glow!

How so? Well, Nitric Oxide helps dilate our capillaries and increases healthy blood circulation to our skin. The enhanced circulation helps bring with it a flood of nutrients saturating our malnourished skin...with new life.

"Bingo! Our Face Ends Up Regaining Its Bright Youthful Bloom!"

But Nitric Oxide cannot be given directly to our skin since it is a gas.

Stop wishing for youthful looking skin at any age. Get LifeCell

Dithiolane-3-Pentanoic Acid - Anti-Inflammatory & Anti-Oxidant

Instead, it has to be produced on the surface of our skin through a naturally produced compound in our bodies called **Dithiolane-3-Pentanoic Acid**...we'll call it D3PA. D3PA levels decrease as we age. However, worry not. **A high concentration of D3PA is included in anti-aging LifeCell.** I seriously doubt if any other cosmetic company has even "heard" of this compound.

In clinical research conducted by a doctor from Yale University Medical School, D3PA was found to be

I don't normally do this sort of thing, but I had to express my gratitude to you people for developing such a remarkable cosmeceutical. I've been using LifeCell now for 3 months and the change in the texture and feel of my skin is simply amazing. My crow's feet look practically gone and my skin looks years younger.

After the first month, I wasn't

University's Medical School, on D3PA's effects...his patients noticed a "healthy glow" within five days of application.

This is expected given D3PA's ability to help produce Nitric Oxide.

Anyways, the marvelous effects of D3PA don't end here. D3PA is also a universal antioxidant...that vanquishes free-radicals known to cause ugly wrinkles.

"But What The Heck Are Free Radicals?"

Well in real-world terms, they're like little molecular assassins in our bodies whose sole mission is killing healthy living cells in every organ and tissue in our body – especially our skin. Free-radicals are the by-products of regular breathing (*you can't avoid them*) and environmental stressors such as: *sunlight, pollution, bad-nutrition, stress, irritants, allergens and environmental toxins.*

Stay with me here, all right. Free-radicals cause wrinkles by attacking and damaging healthy skin cells.

On the lower layers of our skin is a connective tissue called Collagen. Collagen is an integral part of the skin's fabric and gives our skin its strength and elasticity. When free-radicals attack collagen, it becomes damaged... splits and tears.

Then what? Here's "then what."

When collagen starts to tear in the lower layers of our skin...the top layers of our skin sinks down into the open area between...the tear...and...

"A Wrinkle Is Born!"

When we were young we could fight off free-radicals. Because inside each one of us is our very own "natural pharmacy." Inside this pharmacy are numerous potent "drugs" called antioxidants that fight these nasty wrinkle causing suckers. But, as we age, our bodies tremendously slow down the production of these antioxidants. Without anyone to keep them in check, **free-radicals attack collagen mercilessly, leading to ugly wrinkles.**

You see, our bodies desperately need a boost of fresh antioxidants and this is where universal antioxidant D3PA once again plays the role an angel.

And mind you, D3PA isn't a "regular" antioxidant. The problem with almost all other antioxidants (for example, Vitamin E) is they quickly run out of juice when a cell is overwhelmed by a large number of free-radicals. **D3PA has explosively more staying power than any other antioxidant.** It's such a potent antioxidant — it was even used to treat victims of the world's **WORST** nuclear radiation leakage in Chernobyl, Ukraine.

"NUCLEAR-Tested Free-Radical Fighter!"

What's the connection between nuclear radiation and free-radical damage? Exposure to radiation generates a cascade of free radicals that wreak deadly havoc to our bodies... and can even cause cancer.

LifeCell the anti-aging secret shared by European royalty, top models, actresses and thousands of beautiful women...

In the near-fatal nuclear melt-down accident in Chernobyl, Ukraine radioactive leakage caused those who lived in the area to be exposed to constant low levels of radiation. Not surprisingly, the incidence of cancer is much higher than normal there, especially among children.

Listen up: Unbelievable but true, after just 28 days (yes 28!) of D3PA supplements, researchers found children's blood peroxidation levels had fallen to those of normal children. Even better, children's liver and kidney functions were normalized!

"With This Kind Of POWERFUL Free-Radical Nuclear-Busting Skin-Protection Ability, Does D3PA GRAB Your Attention?"

quite sure if there was a lot of improvement, but when I looked at pictures of my face that were taken just before I started the treatment, I was really amazed at the change. And that was just after a month. It's been 3 months now and I can't even express how smooth and healthy looking my skin is. I just had to write this because it's so refreshing to use a cosmeceutical that actually delivers on its word and then some. Thank you so much!

Jennifer McNeally
Ocean City, MD

One of the lowest days in my life was when I found out my 9-year old son was being teased at school by other kids because his mother looked like a "grandmother." I guess I never realized how much I let myself go after my two kids were born. I tried just about every anti-wrinkle cream I could find but none of them worked for me.

Eight weeks ago, I started using **LifeCell**. Since then, my skin has started glowing and my wrinkles appear less visible and I never felt better. My husband loves my skin, my kids won't get teased anymore, and I love the way I feel about myself. Thank you for giving me my life back.

Christine Johnson
Bath, OH

It sure grabs the attention of some of the top research scientists in our country. University of California's (Berkley) Dr. Lester Packer, calls it, "**probably the most potent, naturally-occurring antioxidant known to man**", and a noted Yale University Doctor calls it a "**wonder molecule**" and an "**unparalleled weapon in the battle against aging.**"

“ The world-famous Karolinska Hospital in Sweden conducted studies on **D3PA's** anti-aging & anti-wrinkle effects on women's facial skin. The average age of these women was 54.4 years - no spring chickens. After just 12 weeks of application of **D3PA** their faces showed a "statistically significant improvement"! How significant? Results on **ALL** women showed a decrease in skin roughness of an average 50.8% and a dramatic improvement in the "clinical characteristics related to photo-aging"! ”

One BIG reason D3PA is so invaluable to our skin is because it's a "universal antioxidant" that vanquishes **ALL** (remember, there are many different types of free radicals) kinds of free radicals. Not only that, it boosts the levels of other antioxidant naturally produced in our bodies Vitamin E, Vitamin C and Gluthaione. No other antioxidant can do this!

The best part is, D3PA is both water and fat-soluble. What does this mean? Well, all other antioxidants can either prevent free radical damage to the inside of a cell (water soluble)...or...to the outside of a cell (fat-soluble). But guess what? Free radicals attack both the inside and outside of skin cells. And since D3PA is both fat and water soluble, it protects the entire cell.

The almost miracle-like properties of anti-wrinkle D3PA don't stop here. Here is what else it does...

By now you should be an armchair expert of the effects of inflammation on our skin. I've already ***highlighted*** this before but to refresh your memory, **skin inflammation is an open invitation to lines and wrinkles. D3PA being anti-inflammatory, further helps significantly reduce the appearance of wrinkles.** Isn't this spectacular news how one tiny substance can do so much for our skin? But wait...

"Believe It Or Not It Gets Even Better!"

D3PA's is unique in its ability to help increase our skin's cellular energy. **Why is this important?** Much like an aging person, an aging cell has lower energy. Decreased energy leads to a weakened ability to repair damage and create new cells. By helping to increase a cell's energy (metabolism), D3PA increases the cells capacity to heal damaged skin and create new skin cells. Re-energizing our skin...results in a firmer, less-lined and smoother look.

A world-renowned dermatologist from Yale University's Medical School conducted studies on his patients after applying D3PA on their skin. Here are the stunning results:

- Within one to three days, eye puffiness decreased.
- A ***bright, healthy glow*** emerged within five days.
- Tremendous shrinkage of enlarged pores in two weeks (this was surprising – and scientists don't have an explanation).
Decrease in depth of lines and wrinkles within 8 to 12 weeks
- 70% to 80% improvement of acne and other scars after 6 months.
- And within three months of treatment, very ruddy skin began (and I quote) to take on a **"Porcelain-Like Appearance!"**

[Click here to order LifeCell](#)

Alright. What I've shared with you so far are the astounding benefits of one antioxidant ingredient in "all-in-one" **LifeCell**. Any one antioxidant, however powerful is not ideal in itself. "From a therapeutic viewpoint, few natural antioxidants are ideal," says University of California's Dr. Lester Packer.

Ubiquinone - Super Anti-Oxidant

To further boost our skin's ability to erase the appearance of wrinkles (*and the other tell-tale signs of aging*), anti-aging **LifeCell** has another ultra-powerful antioxidant - **Ubiquinone** - that most scientists say clearly out-shines all other antioxidants. Period!

Not surprisingly, (*or should I say "as expected"*) a few of the fat-cats cosmetic companies are just putting **Ubiquinone** or it's patented derivative Idebenone by itself in their snazzy grey colored pump dispensers and claiming it fights *all* causes of aging. This is an outrageous, **FAR-OUT** claim simply because one ingredient cannot "do it all." However, Ubiquinone is surely a very powerful antioxidant.

So What's All The HUGE Fuss About Ubiquinone?

I'm glad you asked. **Numerous independent studies conclude Ubiquinone helps shield our skin from environmental damage, improves the appearance of fine lines and wrinkles, helps reduce dryness and smoothen skin texture.**

"I don't want to get cosmetic surgery to look young. That's why I use LifeCell instead. Do you?"

In fact, it has unleashed a mad frenzy of *insane* excitement among some of the most reputed (*and otherwise civilized*) doctors in our country. Doctors are making a mad dash tripping one-on-top-of-the-other to vouch for a **Ubiquinone derivative**, Idebenone's efficacy. Seems like they all want to be the first ones *quoted* saying...

"I Told You So!"

Listen to what some of them are saying:

"As a sole agent, I think it [Ubiquinone derivative] is the most powerful antioxidant out there."

Dr. Nathan Trookman
Colorado Springs Dermatology Clinic

"Most antioxidants do not have scientific data to back up their claims. Ubiquinone does — its ability to protect cells and inhibit inflammation has been proven."

Dr. Neil Sadick
Cornell University

"I'm trying not to get too excited, but I am convinced this [Ubiquinone derivative] is the best antioxidant I have seen yet."

Dr. Leslie Bauman
University of Miami

"It's [Ubiquinone derivative] ability to protect cells and inhibit inflammation has been proven. It's part of a new group of antioxidants likely to be one of the most helpful of the next decade."

Dr. Neil Sadick, M.D.
Cornell University

[Ubiquinone derivative] is the "most potent" antioxidant he's researched so far.

says Dr. David McDaniel, M.D.
Eastern Virginia Medical School

But wait! There's more! The doctors aren't alone in their excitement. Ubiquinone has even captured the imagination of the news media across the country, and has sparked the biggest brush-fire buzz of a wrinkle-reducing ingredient in the last 50 years.

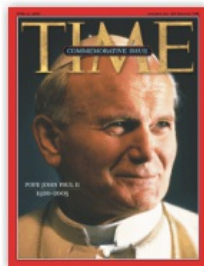

Here's just a microscopically small snapshot of Ubiquinone's mention in the media:

NBC News in a breaking news show on skin-aging called a Ubiquinone derivative a "super skin- saving antioxidant."

Fitness Magazine - "[Ubiquinone's derivative] doesn't just prevent free radicals from ravaging skin—it reverses past damage, too...The Ingredient has been shown to restore cell vitality."

Time Magazine in "The War On Wrinkles" highlighted a Ubiquinone's derivative as a great weapon against fighting wrinkles.

The Times (England's #1 Newspaper) in an article "Forever Young" said, "dermatologists are hailing it [a Ubiquinone derivative] as the most potent skin care antioxidant available. Studies have shown it prevents cell damage linked to aging and wrinkles."

7 News Boston in a news segment, "Wipe Away Wrinkles," called a cream containing [a Ubiquinone derivative] a "Dream Cream."

It just goes on and on and on...which finally brings us to the million-dollar question...

Why Is Everyone And Their Mother Going Hysterical Talking About Ubiquinone's Amazing Effects On Our Skin?

Here's why: Researchers tested and compared the efficacy of 6 of the most potent antioxidants (including a Ubiquinone derivative), known to science, on their effects on preventing free-radical skin-damage. (Journal of Cosmetic Dermatology)

Guess How Ubiquinone Derivative Fared?

As it turns out, **the Ubiquinone derivative received a score of 95 out of a 100, the highest score of the six leading antioxidants.**

As if that's not amazing enough, Ubiquinone is indispensable in the battle against wrinkles for another MAJOR reason. It may literally make years disappear off your face. I know, "years disappear off your face," sounds a wee bit trite, but listen to the juicy little fact that makes it believable.

Like an aging person, an aging cell has considerably diminished energy. Decreased cellular energy diminishes our body's ability to generate new skin cells (including collagen)...or remove dead cells from the skin's surface. This explains, why in our youth our skin is replaced every 21 days, but around 50, our skin replaces itself every 45 days.

The awesome news is: Ubiquinone goes right into our cell's slowed-down "power plants," mitochondria, where 90% of all our energy is generated - and helps supercharge it. Increased cellular energy, accelerates our body's ability to reveal fresh new skin to the surface and speed-up removal of dead skin. It boosts our body's ability to produce collagen, elastin and other important skin molecules, helping our skin look young, healthy and wrinkle-free.

Discover the 8 bonuses you'll receive when you get LifeCell!

European scientists conducted double-blind placebo tests on the efficacy of Ubiquinone on aging-skin and wrinkles. They concluded Ubiquinone drastically reduces free-radical damage to our skin (no surprise here). However, **what left even the researchers astounded was that it showed great potency to reduce the most stubborn form of wrinkles - crow's feet.** Let me quote verbatim from the study:

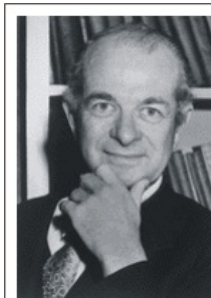

"wrinkles around the region of the eyes ("crow's feet") could be reduced significantly by long-term application [of Ubiquinone]"

Ok, let's move on to the next super-star in **LifeCell**...without which...almost all wrinkle-reducing therapies are useless...

Vitamin C - A Double Edged Sword

Ever since Noble Prize winning scientist Dr. Linus Pauling, proclaimed the wonders of Vitamin C, it has become one of the most widely used ingredients in anti-wrinkle and anti-aging creams.

Vitamin C-based anti-wrinkle creams promising amazing results are popping up like mushrooms all over our country.

Dr. Linus Pauling is the only person ever in history to receive two unshared Nobel Prizes. Ever since he proclaimed the wonders of Vitamin C, it has become one of the most widely used ingredient in anti-wrinkle creams. But there is a catch which most consumers don't know about... read the main text to find out.

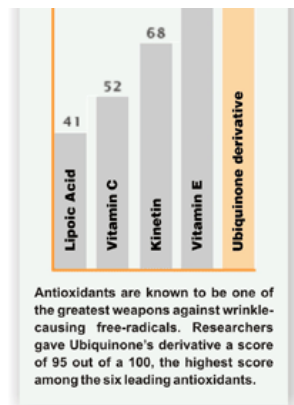

Do Anti-Aging Skin Care Creams Containing Vitamin C Work?

Do their claims have any substance? The situation is a little ***complicated***. On one hand, vitamin C *does* possess definite, scientifically validated merits for wrinkle reduction and skin rejuvenation. On the other hand, most anti-wrinkle vitamin C products *do not* work...and worse...may end up aggravating wrinkle formation.

What Do I Mean By This? You See, Potentially Vitamin C Can Benefit Our Skin In EXTREMELY IMPORTANT Ways Such As:

1. Collagen Synthesis: Collagen makes up about 70% of our

skin's dry weight. As any material, it is subject to wear and tear, and slowly breaks down over time. In our youth, fibroblasts (skin cells – capable of producing collagen) replace broken collagen fibers. But as we age our skin's ability to replace damaged collagen diminishes. This leads to wrinkles and sagging skin.

We could apply collagen creams but remember, collagen being a big molecule does not penetrate our skin and may expose us to the dangers of mad cow disease.

Once again, this is what Dr. Rubin was quoted saying in an article in the New York Times:

"Collagen doesn't penetrate... You can't get the collagen molecule into your skin. It's like taking a steak and rubbing it on your skin to try to make your muscles large."

We could get collagen injections, but one of the main drawbacks (besides costs) is injected collagen is quickly broken up by enzymes and can only be replenished by more injections...meaning thousands of *more* dollars! Besides the danger of mad cow disease, there are reports of connective tissue disease arising after collagen injections.

The good news is, applying vitamin C helps *dramatically* plump up thinning skin by increasing its production of NEW COLLAGEN. With Vitamin C stimulating *your own* collagen production there is no known risk of allergy, no immune reaction and no injection-induced infection. Just natural collagen being deposited in an orderly fashion...*rapidly* bringing back with it your skin's softness, strength and elasticity.

2 . Antioxidant: Vitamin C is an antioxidant — a substance that vanquishes free radicals, those vicious molecules that irreparably damage our cells and accelerate the aging process.

3 . Blood Capillary Strengthener: Vitamin C strengthens blood capillaries... which means fewer broken capillaries are visible on your face.

4 . Enhances Skin Brightness: Got "age spots" or "liver spots"? We all have them. They form because of hyperpigmentation; a condition in which patches of our skin become darker in color than surrounding skin. The good news is that application of Vitamin C helps regulate the production of dark color producing cells. It *helps correct* and *restore* the balance of lackluster skin, dark patches and blotchiness. This evens your skin tone and results in a dramatic improvement in skin radiance.

5 . Prevents Transepidermal Water Loss: Vitamin C helps reduce evaporative water loss from your skin, thus retaining moisture within the skin.

[Click here to order LifeCell](#)

Want proof of the truth behind the above claims? Let's review the last 30-years of overwhelming clinical studies, instead of all those artfully worded glossy ads splashed in fashion magazines.

Researchers in Germany concluded:

“ Application [of Vitamin C] in vivo tests resulted in a significant reduction of oxidative stress [another word for free radical damage] in the skin, an improvement of the epidermal-dermal microstructure and a reduction of fine lines and wrinkles in aged skin. These results were received within a relatively short period of time of ... [Vitamin C] application. ”

Tulane University School of Medicine, in a review of the thousands of studies (way too many to

list) on the benefits of Vitamin C on our skin concluded:

“ A significant body of scientific research supports the use of cosmeceuticals [another word for cosmetics] containing vitamin C ...benefits include promoting collagen synthesis, photoprotection from ultraviolet A and B, lightening hyperpigmentation, and improvement of a variety of inflammatory dermatoses [a skin disease]. Because of the diverse biologic effects of...vitamin C [it] has become a useful part of the dermatologist's armamentarium. ”

As you can see, when vitamin C is *properly delivered* into skin cells, there is a darn good chance to reduce the appearance of wrinkles and improve skin texture.

There are, however, some ***complicating circumstances*** often disregarded by fat-cat manufactures. Instead, they give us the "mushroom treatment."

"You've Heard Of Being Treated Like A Mushroom, Right?"

Truth On Vitamin C
They Won't Tell You

It means being kept in the dark and fed lots of bull... *manure*. That's how mushrooms are grown commercially. And that's also how the fat-cats cultivate our positive perceptions about Vitamin C – without revealing the whole truth.

What's the whole truth? For instance, I bet you didn't know there are many different kinds of Vitamin C. And anti-aging cosmetic companies use what I believe to be the cheapest and least effective form called L-Absorbic Acid.

- L-Absorbic Acid is relatively unstable. In the presence of air or other oxidizing agents, it turns bad in jars or bottles. *An example of oxidization is an apple turning brown when it is cut and exposed to oxygen in the air.* Oxidized vitamin C is **INCAPABLE** of doing anything beneficial for our skin.
- **L-Absorbic Acid is very acidic, and can cause severe skin irritation, swelling, redness and inflammation.**
- Vitamin C when in contact with our skin may actually promote free-radical skin damage...thereby completely canceling-out all the beneficial effects it *could* potentially have had on our skin.

Using Vitamin C in this fashion to deal with wrinkles is at best sort of like undergoing chemotherapy when you have cancer. In other words, not only do the cancer cells get zapped, many of your non-cancerous cells also get murdered...and often...your hair falls out, you get extremely tired and your zest for life is considerably diminished.

Is it possible to give our skin the benefits of Vitamin C without all these "alarming side-effects"? Is there hope? Yes – of course.

Ascorbyl Palmitate - Vitamin C Done Right

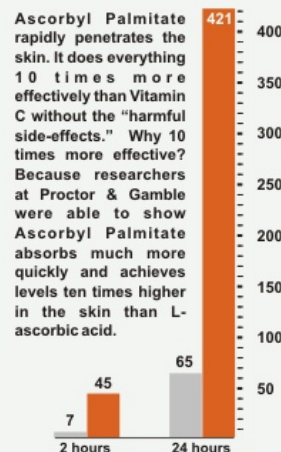

Finally, scientists have discovered a way to join Vitamin C with palmitic acid – called Ascorbyl Palmitate.

- ✓ For starters, Ascorbyl Palmitate is stable. Unlike L-Ascorbic Acid, it can be mixed into creams and still keep its full potency for months — even years.
- ✓ **It is totally nonirritating. It can even be placed on an open cut without stinging.**
- ✓ Unlike Vitamin C, Ascorbyl Palmitate is fat-soluble. This means it offers maximum protection to our skin against free-radicals at the exact spot they wreck the most damage – the outer portion of the cell.

In short, **the scoop on Ascorbyl Palmitate is it does everything 10 times more effectively than Vitamin C without the "harmful side-effects."**

Why 10 times more effective? Because researchers at Proctor & Gamble were able to show Ascorbyl Palmitate absorbs much more quickly and achieves levels ten times higher in the skin

than L-Ascorbic Acid.

Ascorbyl Palmitate

Now for the best part: Dermatologist-recommended **LifeCell** has anti-aging Ascorbyl Palmitate in full potency to work its magic on your skin...and reverse the hand of time...so you look much younger today than you did yesterday...

"I don't want to get cosmetic surgery to look young. That's why I use LifeCell instead. Do you?"

Keep reading, because I have another surprise for you...

Guess what? If you put everything I've discussed so far in a bottle, and apply it on your face, you still won't look younger and keep looking younger as time passes. And that holds true...

"Even If You Apply Everything I've Discussed With Military Discipline!"

What's going on here? How can this be? What am I saying to you? Am I saying even if you apply everything I've said so far you still won't be able to look young?

Yes, that is exactly what I'm saying!

Actually, what will happen if you use all the above anti-wrinkle ingredients diligently is you will actually erase the appearance of wrinkles...get radiant skin...and a glowing complexion...but...you will still look old. And, sooner or later, (probably sooner), you will be totally disappointed with the results and, among other things, you will start considering plastic surgery.

Why?

Because we haven't as yet "covered" the gaping hole to completely reversing the hands of time. You see, facial aging is caused by many changes in the skin, including wrinkling, discoloration, mottling, broken blood vessels, and decrease in radiance...all of which we've convincingly addressed so far.

But, **a sagging face is one of the most prominent signs of aging, more so than wrinkles and all the other tell-tale signs.** As common thinking goes, even young people may have wrinkles but only older people have sagging faces. Which brings us to an important question...

"Why Does Our Face Sag SOUTH?"

Well, the skin itself doesn't sag because it surrenders to gravity. Nah. What happens is, as we age, the muscles under our skin that hold our skin start to lose their tone.

So when a plastic surgeon performs a face-lift, he does not really focus on the skin itself but on the muscles underneath. He works deep below the skin's surface, pulling those muscles back into place and suturing them so they will heal in a new position. The overall effect is a more youthful look, because the muscles appear to have suddenly recovered their tone.

Why Do Muscles Loose Their Tone?

Good question. Among other things, a chemical in our bodies called acetylcholine "tells" our muscles to keep themselves toned. For example, when you flex your arm a flood of acetylcholine is released, because of which your muscles look more toned than normal.

Once aging begins, acetylcholine levels diminish...leading to muscles losing tone...which leads to the skin on top of the muscle sagging. You see how this process plays out?

Now for the good news: The way to reverse this process (without surgery) and produce stronger muscle tone and firmer skin is to - increase acetylcholine levels in our bodies.

How Do We Do This?

While I've tried many off the drugstore shelf brands for dealing with my under-eye issues, this is the first "expensive" product I've tried. I like it. It deals instantly with my fine lines & dryness, while not feeling greasy like many of the other products I've tried. And the affect lasts all day, unlike some others I've tried. I don't know about the other claims on the product's use but it does what I want it to. As for the price, its expensive but I save out on not having to buy all the other creams, so I'm happy. I use it on my entire face and it's definitely the best "youth regainer" I've ever tried.

**Josephine Clark
Saddle Brook, NJ**

The secret lies in a European discovery called Deanol.

Scientists in Europe (Belgium) discovered applying Deanol on our skin helps produce acetylcholine...causing our skin to firm and the muscles underneath to tone-up.

[Click here to order LifeCell](#)

No wonder bodybuilders all over the world are splattering themselves with potions of Deanol and looking t-o-n-e-d...at competition time. I mean, have you ever seen a bodybuilder in top-shape with sagging muscles? You won't. It's an oxymoron. They know what to do when it comes to looking toned.

Bodybuilders aren't the only ones hooked onto the wonders of Deanol.

Celebrities such as: Diane Sawyer; Grammy nominee Diana Krall; Grammy winner Emmylou Harris; Hollywood Mogul & author Nora Ephron; hit fashion designer Cynthia Rowley; Emme (host of E! TV's *Fashion Emergency*); and actress Michael Michele share in their love for Deanol because it instantly gives them baby-bottom-firm-skin for those "special red-carpet" occasions.

Deanol works its wonders in just the amount of time it would take for you to finish a sinful mouth-watering desert. There is no need to spend days carefully applying this and dipping in that until you finally see results. It's quick, it's easy, and it works.

And long-term use of Deanol could help to permanently achieving a leaner look because the muscle tone in our face improves. Some women notice the tips of their noses get a lift owing to the increased muscle tone that Deanol brings about in their foreheads. Believe me, there is nothing that gives our faces a more youthful look than raising the sagging tip of the nose.

The more spectacular effects of Deanol, are the natural lift it could produce in the eyelids in just a few days of use. Its feels like getting an advanced eyelift with 6,500 targeted microlifts.

One of the more spectacular anti-aging effects of Deanol, is the natural lift it could produce in the eyelids in just a few days of use. It feels like getting an advanced eyelift with 6,500 targeted microlifts. On average, women between the ages 40 to 55 have 6,500 micro-points concentrated in the delicate eye area. Deanol's microlifters form a network around the eyes to make the skin look tighter, lifted and firmer. Eyes appear recontoured and wide-open!

Easy trick to shrink puffy eyes fast?

Speaking at the American Academy of Dermatology meeting, Dr. Patricia Farris excitedly said...

“ This is the first time that we have seen evidence that any topical treatment could be helpful in treating the anatomic [muscular] changes that occur as a result of aging. Split face studies showed that patients using topical...[Deanol] show...appreciable lifting of the eyebrows, jowls and cheeks...” ”

Besides firming up our face, Deanol can help us look jaw-droppingly sexy.

Want to guess how? Well let me ask you something. What is one of the most desired "assets" in a woman? Ok, I'll give you a clue...

"Think Angelina Jolie!"

If you guessed...

"Full, Luscious, Come-Hither, Sexy LIPS"

...then you're right on.

Who can argue lips are sensuous, they are sexy, they are powerful, and we want them larger! A plump pout is a symbol of youth, sexiness and sensuality.

**"Full Lips S-C-R-E-A-M 'Kiss Me'
And Men Go Crazy Over Them!"**

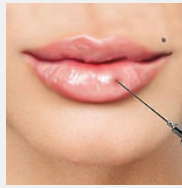

The eyes may be the windows to the soul but our lips are definitely the gateway to sensuality. Full, soft-looking lips seem to compliment and soften any woman's face and bring out her most feminine, sensual and sultry features. Look at the "stars", plenty of them flaunt their big, full lips,

but believe me, not all of them were born with those lips!

How Do They Plump Up Their Puckers?

Let's get the answer right from the horse's mouth. **Celebrity makeup artist Matthew Van Leuwen was quoted in In Style magazine as saying he NEVER applies lip color to his celebrity clients unless he prepares their lips with Deanol (as a lip plumper) first.** He said Deanol...

Better Than Collagen Injections? Clinical studies show Deanol actually helps increase circulation and tone to the lips, creating a fuller, firmer appearance.

"Makes Lips Look As If You Just Made Out For Half An Hour!"

Is he hallucinating? Not at all. Clinical studies show Deanol actually helps increase circulation and tone to the lips, creating a fuller, firmer appearance. It is truly a great way to achieve dramatic increase in lip size, and is a great "special occasion" beauty tool. It's no surprise Deanol is a Hollywood standby for photo-shoots and a favorite trick of models and actresses to get the lips looking extra plump and full.

The secret to fuller, more beautiful lips...

Now Pay Very Very Careful Attention Here...

I've saved the best news for the end, and if you have any desire to...

Not Lie About Your Age, But Boast About It – And Smile When Their Jaws Drop In Amazement...

...then keep reading because right now I'm going to tell you about the perfect "climaxer" to all the anti-aging and anti-wrinkle ingredients in dermatologist-recommended **LifeCell**...

Everyone is talking about Botox® and how it makes wrinkles disappear. Without a doubt when used properly, Botox is one of the best cosmetic procedures. Period.

Botox decreases the ability to smile, frown or squint, thereby preventing the appearance of lines and wrinkles caused by what is known as "dynamic" wrinkles, meaning, wrinkles caused by repeated facial expressions.

Doctors inject Botox directly into muscle to cause paralysis, leading to wrinkle relaxation, a feat inciting famed NY Times columnist Maureen Dowd to assert it was creating a "generation of expressionless zombies."

Anyways, Botox® Users May Have Reasons To Frown... Here's The Other Half Of The Story:

- Botox addresses only one aspect of facial rejuvenation — motion wrinkles. It does not  reduce fine lines, sun damage, skin roughness, nor does it help with acne scars, uneven pigmentation or age spots.
- **The FDA has only approved Botox for use on an extremely limited area (less than 5% of our entire face). That area is the tiny little space where sometimes there is a furrow between your eyebrows. You can't use Botox ANYWHERE ELSE!**
- Regular injections risk skin and nerve damage and actually thin the skin exacerbating some skin problems.
- **Botox users might be surprised to learn they're actually receiving injections of a bacterial neurotoxin called botulinum, one of the most poisonous substances known. Exposure to large amounts of it can cause DEATH.**
- Sometime ago, a couple was in a critical condition in Palm Beach Gardens Medical Center, breathing through ventilators and being fed intravenously after receiving adulterated Botox injections.

- The effect of Botox injections almost completely disappear within 3 to 6  months. After which you need to again and again set up appointments with a doctor, get a new set of injections and spend more money (about \$700)...every 3 to 6 months.
- Pregnant women and women who are breast feeding should not undergo Botox treatment as there has been limited research of its effects on unborn fetuses and infants.

And Hold Your Breath... Here's The Bummer Of Bumpers:

“ Dr. David Becker from Cornell Medical College says, "Patients receiving Botox injections to remove facial wrinkles, skin adjacent to the treatment area may become more wrinkled." (read that again if you like)

You read that right! He explains why people who take Botox may develop new wrinkles as a result of the treatment. "After receiving Botox, a patient may unconsciously attempt to re-create the facial expressions in the area where treatment has paralyzed their facial muscles...What can happen is that other, nearby muscles compensate — this can have the effect of actually creating new wrinkles." ”

In any case, if you do decide to get injected with Botox, it is best used in combination with other procedures.

But, what if you are not interested in paying \$700 every 3-6 months, getting pierced by injections, and you don't want to "risk" anything?

Are There Non-Injectable And SAFE Alternatives To Botox?

Yes and no.

You've got to have seen some of those ads claiming "Better Than Botox?" — the ridiculous nonsense about how a stretch-mark cream can remove wrinkles? Does this product work?

Listen to what consumer advocate and beauty expert Paula Begoun says about one of these products,

"If you are still wondering if there is any way possible that [product's name] might somehow be better than Botox, the short answer is no-and that means no way, and no how."

**But Remember I Said I've Saved
The Best Information For The End?
I'm Not Going To Disappoint You...**

Acetyl Hexapeptide-3 - Ultimate Botox Alternative

Listen: Scientists in Spain (another European connection here) have discovered a compound called **Acetyl Hexapeptide-3**, which anecdotal evidence suggests, **offers the same results as Botox without needles or the risk of damage to the skin or facial muscles.** In other words, many doctors believe **Acetyl Hexapeptide-3 has a similar mechanism of action as Botox... without the toxicity and costs.**

[Click here to get LifeCell](#)

The New York Times quoted an expert on **Acetyl Hexapeptide-3** as saying:

"It [Acetyl Hexapeptide-3] aims to have properties similar to the botulinum toxin and can theoretically act on the same nerve-muscle connection that

Botox works on. Botox breaks the connection, deadening the muscle, while [Acetyl Hexapeptide] merely inhibits the connection, which could relax the muscle."

Here is what Dr. Sumayah Jamal, MD (Assistant Professor of Dermatology at the NYU School of Medicine in New York City) says on **Acetyl Hexapeptide-3** in WebMD:

"Botox works by destroying a protein involved in the release of a neurotransmitter that would otherwise keep a muscle tense, allowing a wrinkle to form," By stopping the tensing motion and relaxing the muscle, the wrinkle seems to disappear, she says.

The Acetyl Hexapeptide-3 attempts to mimic that same Botox action by blocking the action of the protein. It doesn't destroy the protein, like Botox does, says Jamal, but instead simply keeps it from connecting to the cell and turning on the muscle contraction. The end result, she says, may be similar to medical procedures, just much less dramatic.

So In Simple Terms What Exactly Does Acetyl Hexapeptide-3 Do?

Acetyl Hexapeptide-3 blocks the nerve signals (neurotransmitters) that control the contraction of facial muscles. This produces a significant reduction in the appearance of both the depth and size of fine lines and wrinkles.

Unlike Botox, Acetyl Hexapeptide-3 does not involve paralysis, toxins or side effects caused by leaked serum.

Acetyl Hexapeptide-3 is non-invasive and safe for use in all areas of the face and throat (unlike Botox), and provides continuous, cumulative effects, which can ultimately last longer than Botox.

Because Acetyl Hexapeptide-3 works more progressively, its effects are not as abrupt and noticeable as Botox injections and less likely to cause comment. This appeals to most women (including me) who are not interested in drawing attention to their use of wrinkle-reducing products.

I want LifeCell right now!

Any catch? Yes, one. The only downside of using Acetyl Hexapeptide-3 as a Botox alternative is results take a little longer to materialize and are more gradual. But if you can live with that, I believe Acetyl Hexapeptide-3 beats Botox to the punch!

Bottom Line: It is quick, safe, easy, you don't have to sell the farm to afford it, and people just love its 'softening effect' on the face.

What about proof it works? **In a clinical study published in the International Journal of Cosmetic Science, Acetyl Hexapeptide-3 has been shown to reduce the depth of wrinkles up to 30% after just 30-days of use!** A 17% reduction of wrinkles around the eyes after only 15 days of treatment! Tests also show a 39% improvement in smoothness, 42% improvement of dryness and 45% improvement in overall skin tone!

As I said, Acetyl Hexapeptide-3 is the perfect climaxer to making you...

**"Look As Young On The Outside
As You Feel On The Inside!"**

And Acetyl Hexapeptide-3 is included in dermatologist-recommended **LifeCell** to really make a difference... on your appearance.

Oh, one last thing, I need to tell you without which everything I've said so far falls flat on its face.

Pay attention: The majority of anti-wrinkle creams and anti-aging skin care products do not penetrate the epidermis (*outer layer of our skin*) at all. Better skin products on the market may penetrate 4 to 5 layers into the epidermis, which produces little or no tangible results. As it turns out, **the molecules in LifeCell are much smaller than the molecules in our skin. Because of this they can...**

"Penetrate Down Through 20 Cell Layers Of Human Skin!"

And as dermatologist-recommended **LifeCell's molecules penetrate through each and every layer of your skin...they saturate your skin with almost all the possible healthy anti-aging and anti-wrinkle ingredients needed to bring a silky soft, smooth look back to your complexion.**

Now if you have even one ounce of desire in your veins to look younger and younger as the days go by then...I really hope you are almost ready to burst with excitement!

Because quite frankly, I've just given you **the best non-surgical, non-injectable, all-natural formula for fast and furiously erasing the appearance of wrinkles, "feather" lips, blemishes, age spots, crow's feet and sagging skin!**

*The best part is, it **simply does not matter what your age is**, the actual process of eliminating lines and wrinkles will start to occur within minutes of application.*

Let's Wrap It Up...

Think about it: Dermatologist-recommended **LifeCell** is actually the **world's first ALL-IN-ONE...** fast-acting anti-wrinkle cream, firming cream, 24-hour moisturizer, age-spot reducer, under-eye corrective treatment, lip-plumper and makeup base! All you need is this one wonderful cream on your dresser for ALL purposes. Throw away the others and just use **LifeCell!**

You Get The Best Of ALL Worlds!

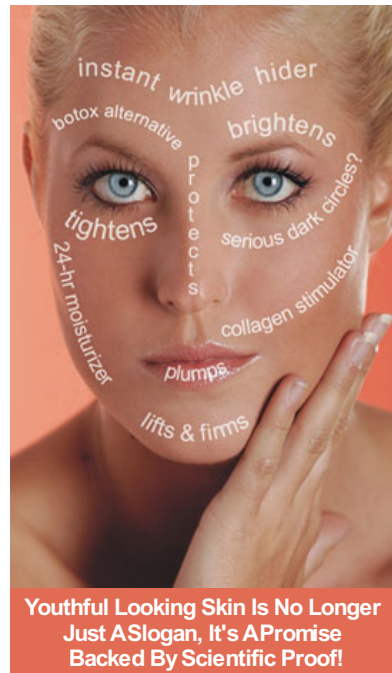

◆ Bye-Bye Wrinkles Instantly?

Almost nobody knows this... but... the human eye cannot see a wrinkle. What the eye sees is actually the shadow made by the wrinkle. So, once natural light is bounced into a wrinkle, its shadow is eliminated and the wrinkle appears almost invisible! **LifeCell** contains fractionated silicon dioxide, in other words - billions of three dimensional nanoprisms. Since all those billions of microscopic 3D nanoprisms refract light, when you use **LifeCell**... there are no shadows to see. This effect will last until you wash your face and the invisible silicon dioxide is removed. *Note: this works for shallow lines and wrinkles only.*

But there's more! You can be darn certain the appearance of... smooth, wrinkle-free, baby-soft skin doesn't wash off once you remove the cream! Here's what else LifeCell does:

- ◆ **The End Of Botox?** As soon as you apply **LifeCell** to your face, an active isolate in **LifeCell** called Acetyl Hexapeptide-3 (AH3) starts working its almost instantaneous magic. Researchers believe that anecdotal evidence suggests, **AH3 has a similar mechanism of action as Botox. AH3 is supposed to work by relaxing facial muscles in a less invasive fashion than Botox**, the injectable toxin used to paralyze facial muscles temporarily and thereby reduce the appearance of wrinkles. However, unlike Botox, AH3 does not involve paralysis, toxins or side effects caused by leaked serum.

This produces a significant reduction in the appearance of both the depth and size of fine lines and wrinkles. It is quick, safe, easy, you don't have to sell the farm to afford it, and women just love its 'softening effect' on the face.

- ◆ **24-Hour Moisturizer:** LifeCell intensely moisturizes and nourishes your skin... like it has never been moisturized before ever! (*Many pharmacists believe LifeCell is the best moisturizer in the world because it can penetrate through 20 skin cell layers.*) It's a welcome surge of relief you feel instantly.
- ◆ **Natural Collagen Stimulator:** LifeCell helps stimulate production of collagen, helping lines, wrinkles and unsightly "crow's feet" to look more smoothened out, lifted away. Wrinkles appear pushed up and out as though plumped from within. 
- ◆ **Microlifter and Firmer:** LifeCell's 25,000 microlifters immediately form a network to help make your skin look tighter and firmer. (*On average, women over 40 have over 25,000 micro-points on their face which LifeCell's microlifters target.*) 
- ◆ **Age Spots:** LifeCell reduces the appearance of discolorations and imperfections.
- ◆ **Beautiful Eyes:** LifeCell increases balance of moisture in the gentle skin around eyes. Eyelids appear lifted, eyes look recontoured and wide-open.
- ◆ **Serious Dark Circles and Under-Eye Puffiness?** LifeCell reduces the appearance of under-eye puffiness and dark circles. And this happens at the same time... LifeCell reduces the appearance of eye puffiness and dark circles.
- ◆ **Lip Plumper:** Lips appear fuller; fine lines around the mouth appear smoothened and lip "bleed" is prevented. Your "provocative pout" remains soft, moist, seductive... all day, all night! With continued use your lips' natural color looks restored.

All of this means your lines, wrinkles, sagging skin, age spots, skin discolorations, under eye puffiness and dark circles... appear fainter and fainter... and... if you use LifeCell long enough, it is possible all these tell-tale signs will no longer even be visible. In addition, your skin will glow radiantly and your lips will appear plumped-up!

When South Beach Skincare first gave me the formula to try, oh boy, was I excited.

Look more beautiful today than you were at 20...

The first thing I noticed about LifeCell was its rich silky texture and soothing fragrance.

When I applied dermatologist-recommended LifeCell to my face, I could actually see my skin, right before my eyes, soak it up like a dry sponge soaks up water.

And from the moment I applied it to my face I could feel it start to work! It felt like every last pore on my face was being tightened and pulled by a gigantic vacuum cleaner. NO KIDDING! I don't know how else to describe it.

I could feel a deep, warm, tingly sensation on my cheeks, around my eyes, and my forehead. I looked in the mirror and saw a rosy-tinged hue. A radiant, glowing hue that was the result of nourishing blood rushing to the surface of my skin. And these marvelous "sensations" lasted for hours! And better still...they became even more intense as the morning went on!

And it wasn't just the "feel," it was also the "look!" **The lines, the pores and the wrinkles – without question – were visibly reduced in size right before my eyes!**

The lines on my forehead, the loose skin on my neck...even the age spots on my face...looked so much less noticeable. Yes! In just a matter of minutes, I could easily see a huge difference in my complexion! **I've never felt and seen anything tighten my skin with this kind of force!!**

And what's more, my skin not only stayed that way it actually got better and better looking each day until it got as beautiful and flawless looking today as it was 15 years ago.

(**Side Note:** Under penalty of perjury, we formally state that the following comments are from REAL customers and REAL medical professionals. See if anyone else is willing to say that about their testimonials. They can't, because theirs are FAKE. If you have a REAL testimonial, send it through my contact form.)

[- - - - -]
 | "Now My Boyfriend Can't Stop Kissing Me" |
 | - - - - - |

(Deviahnna is a mother and a famous fulltime model living in the paradise called Hawaii. Her face has graced the covers of many advertisements, and catalogues in Hawaii. If you are ever in Hawaii, don't be surprised to see her smiling at you from a Billboard.)

Listen to what Deviahnna says...

Since, I depend on my beauty to make a living, I take utmost care as to how my skin looks and feels.

Besides, I really don't want to get wrinkles, dark circles, under eye puffiness, dry skin, and age spots on my face. I take good preventive action to make my skin look soft, supple and youthful, forever.

So, I'm soooo glad I found **LifeCell** because it does it all. Can you believe it... it's an intensive 24-hour moisturizer, an anti-oxidant cream that protects against dangerous wrinkle causing free radicals, and a lip-plumber (among other things). Talk about convenience. I no longer have to lug around 5 to 10 different beauty creams to my photo shoots. I just carry **LifeCell**.

After I started applying **LifeCell**, my skin began to glow radiantly! It looks fresh and rejuvenated. My boyfriend loves touching my skin! My friends keep asking me my "secret." They think because I am a model I have some "special magic portion" that I put on my face everyday. That is just not the case. LifeCell is all I use.

Youthful skin without needles...

Oh, one more thing, when I apply **LifeCell**, my lips appear plumped up and now my boyfriend can't stop kissing me! I've tried some "plumping" products that severely sting and burn and, yes, do puff up your lips for about six hours. Who wants to go through that kind of agony?

They're not for me. As far as I'm concerned what **LifeCell** does is so much better. First, it feels totally nourishing and soothing. It's a balm that even helps restore your lips' natural healthy color. With continuous use my lips have started to appear fuller (I think because they're softer and no longer wrinkly). But, it doesn't sting.

"No Man Is Going To Go Through The Agony Of Applying 10-15 Different Creams Everyday To Look Young. I'd Rather Get A Root Canal Than Do That. LifeCell Is So Much More Convenient"

I am a 50-year-old man. Much of my life has been spent in the sun and I find myself with many skin "issues" as I age. It was sort of shocking to see myself in the mirror and see more and more wrinkle and lines appear everyday in addition to the age-spots, freckles and splotches.

I found out about **LifeCell**'s anti-aging system from my hairdresser who is 43 and has absolutely gorgeous skin.

I'm not sure what all the ingredients are supposed to do but I figured why not try it. Initially I was sold on the fact that I do not have to apply 10-15 different creams, each addressing a different "tell-tale" of skin aging.

For example, one cream for wrinkles, one for sagging skin, an antioxidant, a day cream, a night cream, an age spot cream and so on... No man is going to go through the agony of applying 10-15 different creams everyday to look young. I'd rather get a root canal than do that.

The perfect anti-aging solution for men

LifeCell is so much more convenient. It takes care of all the different tell-tale signs of aging in one tube.

I've been using it for about 2 months now and more than a few people have been telling me that I look younger somehow. I do see that my wrinkles have smoothed out and my skin feels smoother and even toned. I believe this is the best anti-aging system hands down. Hey it works!

"What Would A Drop-Dead Gorgeous 19-Year Old Fashion Model From New York City Know About Erasing The Appearance Of Wrinkles Without Cosmetic Surgery Or Injections?" More Than You Think...

(New York City is buzzing with the excitement because of the entry of a new and upcoming ravishingly beautiful model and actress named Sarah Lynch. If you haven't as yet seen her adorn the covers of magazines and TV ads, then you soon will. Sarah grew up in a small town in New Jersey, where she spent most winters on the ski slopes and scorching summers on the Jersey shore. Even though she is so drop-dead beautiful, she struggles with dry skin from the winter's snow, wind, and cold, and like most people, battles sunburn and skin irritation from the sunny, salty and sandy summer days on the beach.)

Sarah Lynch
Model & Actress
(Click To Enlarge)

Listen to what Sarah has to say...

"The energetic life in New York is so exciting! But with balancing early morning photo shoots and long days on set, with parties and the night scene, I began to get ugly dark circles and puffiness around my eyes. I tried almost every skin cream on the market, and found nothing that worked. I spent a small fortune on buying junk cosmetics.

Finally I was introduced to "all-in-one" **LifeCell**. From the first time I tried it, I could see that I had finally found a cream that soothed my dry skin, erased the appearance of my under-eye circles, and helped get rid of the appearance of puffiness that I hated, all at the same time!

[Click here to discover youthful looking skin at any age](#)

LifeCell leaves my skin radiant, making all of my friends wanting to know my secret! My face is so soft, and really smooth. Finally I have the confidence and beauty I have always wanted.

Unlike most products, I found that this cream was not a bottle of empty promises...it actually worked! Miraculously, it erases the appearance of fine lines, wrinkles, sagging skin, age-spots, under-eye puffiness, "feather" lips, and helps prevent further damage caused by the sun.

How do I know? **You see**, I gave a tube to my mom, and it showed outstanding results on her face too! She's been using **LifeCell** for the past 4 months and now no one believes she is 54 years old. Now she has to constantly show them her driver's license to prove her real age.

So if you are interested in not just rolling over and letting time take its toll on your face – then fight back, and feel the years fade away as you dab yourself with LifeCell to a younger looking you... It's truly amazing!

Thank you,

Sarah Lynch, Age 19
Fashion Model
New York, NY

Are these people any different than you? I don't think so. They're just good, people (*with some being world-renowned experts in skin care*) who are so blown away by the results they've seen with **LifeCell** that they're willing to sign their names to a testimonial. It takes a heck of a cosmeceutical to inspire that kind of cooperation.

Well girlfriend, that's it I guess. There you have it!

I've Just Given You The Top-Secret Formula That Includes A Nobel Prize Winning Discovery To Regain Your Youthful Appearance!

But I'm not worried. No one is going to be ripping me and **South Beach Skincare**, because – in every possible instance – we took the most expensive and most time-consuming – path to creating anti-aging **LifeCell** and maintain its full integrity. Who's going to want to spend the time – and the money – tracking down exotic all-natural, anti-aging ingredients that cost 4 to 5 times as much as the cheap chemical stuff they're used to using... fighting US Customs bringing in the expensive Spanish A3P & Swedish DP3A... putting in 10 times Swiss Ubiquinone, when only a pinch lets them legally mention it in their labels... traveling to Paris for high potency Deanol... or testing and re-testing the anti-aging formulation until it's absolutely certain all ingredients are working at peak efficiency?

I'll Tell You Who – No One But Us!

And I'll tell you something else we did. **We found the most sophisticated and modern and well-equipped medical laboratory in the country to do LifeCell's formulating.** No I'm not going to tell you where it is – this is a secret we intend to keep away from our competitors forever!!

What's So Important About This Lab?

Well, for one thing, they create much of the medicines for dermatologists so they know their way around a quality formulation. World-class dermatologists contact this lab to make custom formulations to treat their patients... which cannot be addressed by drugs found at regular pharmacies. For another thing, **since it is a pharmaceutical lab, it has a special drug-**

manufacturing license that keeps them under the restrictive scrutiny of the FDA and state licensing boards – this lab runs a squeaky clean operation. This makes a big difference – because cosmetics don't legally come under the regulations of the FDA... which means the fat-cat cosmetic companies are not required to have trained, licensed pharmacists on staff!!

[Click here to order LifeCell](#)

The pharmacists that formulated dermatologist-recommended **LifeCell**, on the other hand, are fully-licensed and trained, which allow them to actually create much of the unique ingredients in **LifeCell**! This eliminates the reliance most labs have on outside sources – sources that are too-often tempted to dilute the potency, or mishandle the ingredients.

"It Does You No Good To Apply Something On Your Face That Has Oxidized Ingredients That Have Died Somewhere Between The Manufacturer And Your Face!"

The fact is, a lot of the goop on the market is crammed with ingredients that may have been what the label says they are at one time, but have been altered during formulation or storage... and lost all of their potency!

At the lab we use, every batch of ingredients that comes in is checked... and then double-checked to verify its potency and efficacy. Every once in a while a portion of Ascorbyl Palmitate or something equally crucial will arrive from the manufacturer that isn't what it says it is – and our lab sends it right back. Those fat-cat cosmetic companies that make the other skin care products? They wouldn't know if it was real Ascorbyl Palmitate or baking soda. It would just go into the goop.

And here's an interesting little tidbit: The head pharmacist at our lab was so impressed with **LifeCell**...

"He Gifted A Year's Supply To His Wife!"

He said it was the first "real" deal he'd ever seen worth anything – most other products he'd worked on were poorly designed, and hardly worth the bother. That's quite a testament to the trust he puts in **LifeCell**.

Now for the next question I'm sure is on your mind...

How Much Does "All-In-One" LifeCell Cost?

Well, I'll tell you – it doesn't cost anywhere near as much as it should, considering the immense amount of trouble and expense we went to create it. If South Beach Skincare kept **LifeCell** just as a custom job for their rich celebrity and European Royalty clients (which they considered doing – charging about \$1,000 per tube), we could have charged them almost anything we wanted. The product gets results, and these elite-types will pay anything for results.

Besides, you can't find dermatologist-recommended **LifeCell** for any amount in any skin care store. Nor can you find anything even remotely similar, anywhere. This is a one-of-a-kind formulation.

But one thing I am not, is greedy. Even though this is without question the most expensive cosmeceutical ever formulated for erasing the appearance of wrinkles (*or any other tell-tale sign of aging, for that matter*), our profits are nevertheless very small. We don't need a lot, because we're not running a greedy show here in the wilds of a fat-cat jungle. Other companies bump the price of their products – shamelessly – up to 500%! And I don't feel that's fair. The profit on our anti-aging cosmeceutical is a fraction of that and I don't care what the "experts" say.

And most importantly, I didn't stumble upon **LifeCell** to take your money!

I got lucky to have found it. I still thank my stars everyday. Someone is looking over for me from above. All I wanted is to...

"Look Young, Again..."

And since it worked for me and numerous others I decided to share it!

The intelligent womens' secret to loose the appearance of wrinkles, without drastic surgery or injections...

Listen, we live in tough times today. It helps to age gracefully and have a radiant glowing complexion. Who can argue with that? Some say aging is an unavoidable fact of life; they imply

there are things you can do to face its challenges gracefully. I don't accept that way of thinking. I want to show you how to "AGE YOUNGER." And I'm going to tell you something no one wants to talk about publicly. Even most of your friends won't admit this but, the truth is...

"Inner Beauty Alone Isn't Enough!"

Maybe you don't like that. Maybe it's unfair. But the truth is the truth.

I'm telling you all this because I really care for you. I went through I lot...and I know how we all feel. **LifeCell** has truly turned my life around. **I can't keep up with the compliments I get.** **People drop their jaws in shock when I tell them my real age.** It's overwhelming and humbling at the same time. I feel reassured, confident and full of life. And my husband is so **addicted** to touching my soft skin...he fondly calls me...

"A Healthy Life-Long Addiction!"

I truly believe **LifeCell** is the answer to regain your youthful appearance.

But I need to warn you...

"Quite Frankly, LifeCell Isn't For Everyone!"

In fact, there are some women I hope never find out about this. I'm dead serious. **LifeCell** is not for women who *think* they have wrinkles because, on a rare occasion, they had a "bad-hair day". Dermatologist-recommended **LifeCell** is a custom-designed formulation created especially for women who really have wrinkles and all other tell-tale signs of age creeping up on their face.

So I want you to know, LifeCell is not for you, unless:

1. You are serious about aging gracefully and having radiant glowing skin.
2. You are going to commit to using a sunscreen with either Zinc Oxide or Titanium Oxide! *(And remember, if you smoke you aren't going to get anywhere near the results you "could" have got.)*
3. You are willing to commit yourself to giving **LifeCell** a "fair-chance". What do I mean? For instance, the silicon dioxide and Deanol will definitely show almost instant results. And a lot of the other positive changes in your appearance will take a few short weeks. Although, the results are almost miracle-like... you are not going to start looking like a high school student overnight, okay? So you've got to try **LifeCell** sincerely for at least 90-days. (I'll even make it worth your while...give me a second, I'll explain)

I want LifeCell now!

Are You Still With Me?

Good.

I am darn proud of LifeCell. It's got more integrity and honest value than anything else I've ever tried – and I've tried hundreds of different creams, girlfriend.

And I'll tell you what...

So, do you want it? Good. If I didn't believe, deep in my heart, you would want to try dermatologist-recommended **LifeCell**, I wouldn't have bothered pouring my heart out to you.

But with so many bad anti-aging and anti-wrinkle creams out there, and no objective scoreboard to tell you which one works and which does not, how can you be sure you are not going to be ripped off? Maybe you are shaking your head and saying and thinking, "*This is too good to be true.*" I don't blame you for being skeptical. Many dishonest companies try to take advantage of women and scam them out of their money. That is not the case here. And, there is a "test" that is a very accurate indicator of whether or not any product offered to you is true or not true. And that test is...

"Money!"

What I mean about that is, when you get involved with a fat-cat that is trying to cheat you, they always paint a rosy picture of what you will get after you pay them a lot of money. However, what I've been thinking about is how you can get this product without risking a dime?

And, I've put a lot of time and energy into that question.

You see, in order for "all-in-one" **LifeCell** to "stand-out-from-the-crowd" I needed a way to prove to you...*beyond a shadow of a doubt*... it is everything I've said it is – an all natural, completely harmless way for you to reverse the tell-tale signs of age... *in the fastest time humanly possible*... without the need for cosmetic-surgery or Botox injections.

So, Here's What I've Come Up With:

I'm not even going to dream of asking you to take any financial risk if you think dermatologist-recommended **LifeCell**, which inspired by Nobel Prize winning research, is not exactly what you have been looking for. No, I'm going to make it as easy, and as simple, as is humanly possible for you to try this amazing new cosmeceutical out for yourself... without risking a single dime of your own money.

"I'm Going To Send It To You For Free!"

Here is what I mean: I will not process your credit card or I will not deposit your check for at least 30-days. (You can even postdate your check for 30 days ahead, just incase you are skeptical about LifeCell's amazing effects on your skin).

That means if you don't like LifeCell... for any reason or no reason at all...you can return it within 30-days and get back your un-cashed check... or... if you ordered by credit card... I will simply destroy ALL credit card information you gave me, and your card will NEVER be charged a single cent!

But wait I've made it even better... just incase you are wondering, if you do decide to keep LifeCell beyond 30-days and let South Beach Skin Care charge your card (or cash your check)...

"You Are Still Completely Covered By A Full 100% Iron Clad, 120 Day, No-Nonsense Money-Back Guarantee!"

FAIR ENOUGH? 😊

Michelle

Once again, this means:

- 1. Try FREE For One Full-Month Before You Buy:** Get **LifeCell** and try it free for 30-days. I will not process your credit card or cash your check for 30-days. If you don't like **LifeCell**... for any reason or no reason at all... return it within 30-days and get back your un-cashed check... or... if you ordered by credit card... I'll simply destroy ALL credit card information you gave me and your card will NEVER be charged a single cent! Plus, you can keep all the high-priced bonuses just for giving it a try.
- 2. 120-Days (4 Months!) 100% Money-Back Guarantee:** Get **LifeCell**, try it... if you're not satisfied, for any reason or no reason at all... return it, and you'll get an immediate, no questions asked refund of every cent you paid. No hard feelings. Plus, you can keep all the high-priced bonuses just for giving it a try.

There will be no hard feelings and we can still be friends. I trust in this anti-wrinkle cosmetic, and I believe after you have experienced the same results as many women who have tried it before you, you will find it impossible to take me up on my "almost too good to be true" guarantee.

That's a darn good, no-risk-on-your-part guarantee! And it means there is absolutely no reason in the world for you not to try LifeCell out.

But why am I willing to give you a, try it free - pay no money for 30-days, 120-days, 100% money back guarantee?

Does that sound strange to you? I'm sorry if it does, but I know what it's like to be ripped off time and time again by useless wrinkle-reducing creams, and it's not nice. I've already told you I've been a victim myself. So, no matter what... I intend to treat you like I would like to have been treated myself. In other words, I believe you deserve to be able to try my product out...*risk free*.

How Can I Afford To Be So Generous?

Very easy - so far, every single woman I know of who has used this amazing little all-in-one anti-wrinkle cream, has experienced results that - as you saw in the above testimonials - almost defy belief.

And in truth, I know almost all of the people who try out my cosmeceutical, become repeat customers - ordering many more tubes of this amazing cream - again and again.

So, I'm very confident it is going to work wonders for you too. And I firmly believe when you

experience the same remarkable results I have spoken about in this letter, you will undoubtedly become a repeat and valued customer and friend of mine also.

Here's the deal: If you want to get your 40-day supply, then you need to move fast... *right now, in fact...* before it's too late. There are only a certain amount of "no risk" tubes being made available.

For the fastest possible service, all you need to do is have your credit card handy and [click here](#).

Or, if you prefer to pay by check, or money order, (\$189 per tube with free shipping) simply make it payable to **"South Beach Skincare"** and mail it to the following address:

**South Beach Skincare
1909 Tyler St Ste 701
Hollywood, FL 33020**

That's all there is to it. As soon as I receive your order, the package will be sent to you by Priority Mail 3-day delivery! The price for a 40-day supply of **LifeCell** is an absolute steal, too cheap in fact, at just **\$189** (*free shipping - I'll even pay for the shipping myself*), it's an absolute give-away when you consider how much it costs to buy multiple creams, get a surgical face-lift or Botox injections.

No-Risk Secure Acceptance Certificate

YES! I'm **EXCITED** to get a 40-day supply of the amazing all-in-one **LifeCell** anti-aging cream...and I know there's no time to lose. I understand **LifeCell** (partly based on Nobel Prize winning science) is used by Hollywood actors, celebrities, super-models and even...European royalty to keep their skin looking young, beautiful, and age-free...without Botox injections, or plastic surgery!

YES! Dermatologist-recommended **LifeCell's** got more integrity and honest value than anything else on the planet. There is nothing else like it... for any amount of money.

Thanks for not charging my credit card for at least 30-days...that takes all the pressure off my decision. That means if I don't like **LifeCell**... **for any reason**...I can return it within 30-days and ALL the credit card information I'm giving will simply be destroyed, and my card will NEVER be charged a single cent! (The checkout screen will say **\$189** although this amount will not be charged to my credit card for about 30-days.)

If I do decide to keep **LifeCell** beyond 30-days and let **South Beach Skincare** charge my card... I am still completely covered by a full 100% iron-clad, 120-day, no-nonsense money-back guarantee! This means, if for whatever reason I am not happy with this cosmetic, I will simply send back the tube within 120-days, and get back a **personal check** or a full refund to my credit card.

YES! I understand that when I get **LifeCell** I'll also get the following bonuses reports absolutely free:

- ▶ **Bonus #1** "Give Me 10 Minutes And I'll Show You How To Look Absolutely Gorgeous!", swears world-famous makeup artist Allison Saunders. Allison's breakthrough, "Become Your Own Makeup Artist" system will have you looking and feeling stunning, sexy and glamorous!
- ▶ **Bonus #2** World-Class Makeup Reveals, "How average looking "Plain Jane's" all across America are starting to look drop-dead gorgeous in a few minutes using a revolutionary new makeup and beauty secret that's repeatedly proven to turn heads of men and women that come in your path... and make you look and feel like a million dollars!"
- ▶ **Bonus #3** Professional Makeup tricks that instantly wipe 10 years off your face!

- ▶ **Bonus #4** The Art Of Illusion – How to Make The Mirror Lie!
- ▶ **Bonus #5** How to Make your Legs Look Like A Mile Long!
- ▶ **Bonus #6** Amazing Youth Foods That Give You The Inner Chemistry And Outward Appearance Of Much Younger Women!
- ▶ **Bonus #7** Amazing Weight Loss Secrets That Make You Look Years Younger, Including Three Tips To Make Weight Disappear Instantly!
- ▶ **Bonus #8** How Doctors Urge You To Have More Sex If You Want To Stay Young!

Don't put this off! Remember... you will not find anti-aging **LifeCell**, (or this offer), anywhere else on the planet. There's a very real, and very serious, chance this offer won't be around for very long! And if you don't get your supply of **LifeCell** right now, you may never see this offer again... EVER!

Don't let that happen! You stand to lose nothing except the appearance of wrinkles, lines, age spots, sagging skin, under-eye puffiness and dark circles, and yet what you can gain is worth a thousand times its weight in gold to any woman who wants to reveal the youthful-self that still lives within her!

I honestly hope to hear from you now.

Sincerely,

Michelle Bell

P.S. If you have any questions, or queries about **LifeCell**, then please don't hesitate to call me "personally" on my office phone number below, (just ask for me). It's sometimes nice to know there is a real person behind the words and I will be more than happy to talk with you between business hours 9am to 5pm.

Please don't put this off. You can see by what other women are saying that this is truly and honestly the real thing. If you're **SERIOUS** about regaining your youthful appearance, and you do use **LifeCell**, the results you see will astonish you and put the "envy" into your friends.

P.P.S. I almost forgot to mention, as an added bonus for ordering your supply of **LifeCell** within the next 48 hours, you will be able to enroll in the South Beach Skincare's "Home Delivery Plan", if you choose so. The Home Delivery Plan is an exclusive plan that offers you:

- ✓ **\$40** discount off the regular price of **LifeCell** -- discounted price is **\$149** for subsequent shipments!
- ✓ Free shipping on all Home Delivery Plan shipments!
- ✓ Convenient automatic shipping and billing!

With enrollment in the Home Delivery Plan, you will receive automatic shipments containing a full 40-day supply of **LifeCell** approximately one week before your current supply runs out. The normal price of a 40-day supply of **LifeCell** is **\$189** (*free shipping*). But, your card will only be billed the discounted Home Delivery Plan price of only **\$149** (with free shipping), the day your product is shipped.

There are no enrollment fees, and your purchase is backed by South Beach Skincare's 30-day 100% No Questions Asked, Iron-Clad Guarantee. And if, for any reason, you are not totally and utterly thrilled with **LifeCell** (*highly unlikely*), you can immediately be taken off the Home Delivery Plan with one simple phone call.

If you do decide, for whatever reason, that **LifeCell** is not for you, just call that number and we will immediately take you off the Home Delivery Plan and your credit card information will be completely destroyed. There will be no questions, no hassles, and no lengthy procedures to go through. You have my word on it!

P.P.P.S. One more thing – it's important. Because anti-aging **LifeCell** is so customized (*there isn't a cosmeceutical like this in the world*) and so expensive to make, we do not keep a large supply of it on hand – it's just too darned expensive for us to do that. Instead, we have a close relationship with the lab to make sure we're well-stocked to handle expected orders. But even so, sometimes we get so swamped with unexpected orders (some women order 10 units at a time, for themselves and all their friends!) that we fall behind a little bit. So I urge you to **order NOW** and avoid any wait you might have if we're forced to run a new batch to fill orders. Thanks girlfriend.
